Home Theater And Smart Automation Services Offered In Charleston SC

September 18, 2015

September 18, 2015 - PRESSADVANTAGE -

Innovative Sight & Sound is proud to announce that they have opened a third office from where they will be delivering their home theater and smart automation services. The business already has offices in Santa Rose Beach, FL and Clearwater, FL. They have now opened their doors to an office in North Charleston, SC as well. So far, the community has been very welcoming and it looks as if more homes will be equipped with smart automation.

"Since we first opened our company, our goal was to expand our reach to more customers in different locations," says Jason Gshwandtner from Innovative Sight & Sound. "After the success of our operations in Florida and through our website, we decided it was time to make the move and open up in South Carolina as well. Where we will go next is anybody's guess, but today it's South Carolina and tomorrow could be the world! We think big and that is something that shines through in our services to our customers as well."

Innovative Sight & Sound Charleston will deliver the same services as the two Florida offices. These include custom home theaters, smart home automation, whole house audio, security systems, and structured

wiring & networks. Naturally, they will also be offering service and support to their clients.

The work the company has done to date in both Florida and South Carolina has been very positively received. "Highly recommend," says Pete F. from Santa Rosa Beach, FL. "The purchase options that were presented met or exceeded our needs and expectations, the installation techs were proficient and timely, and the follow-up after commissioning in response to our inquiries was always answered professionally and courteously."

For Innovative Sight & Sound, the clue is in the name: innovative. They want to come with out of the box solutions that give their customers everything they have been looking for in terms of home automation. "Our portfolio really speaks for itself," adds Jason Gshwandtner. "We have worked in many different types of properties, both inside and out, and our clients have always been happy with the result. We can't wait to show South Carolina how cool we can make their home."
