

Oakland Concrete Solutions Completes Site Redesign

January 11, 2021

January 11, 2021 - PRESSADVANTAGE -

To better serve their customers, Oakland Concrete Solutions has taken it upon themselves to completely redesign their website. This improved website version is now up and running. It's just one of the many ways that this 35-year old Oakland, CA concrete contractor shows how focused they are when it comes to providing top-notch customer service. The newly redesigned website has many features that make it a significant improvement over the old one.

A representative of the company said, "We realize that we are in a very competitive business and that means we have to be progressive to stay ahead of our competition. One way we felt that we could do that was by totally redesigning our website. We put a major emphasis on making it more user-friendly in a way that it gets our customers to the specific information they are looking for on our services in a much faster manner. The site design was a solid team effort between the veteran concrete professionals on our staff and our experienced IT services provider. We are very pleased with the way that our redesigned website turned out and so far the feedback from our customers that have used it has been very positive. Our company will never stop being forward-thinking to better meet our customers' concrete needs."

According to the company representative, several new features and changes have been added or done to their website that he thinks site users will be very happy with. It all starts with the new look of the website. He

says that upon recommendation from their IT provider, the colors of the site have been made to be more neutral and it's not overcrowded with photos and other visuals. The text on the pages is now laid out in a much easier to read manner and presented in a much more concise fashion. Even the drop-down menu has been reworked and simplified. The company representative went on to say that the newly redesigned website also does a nice job of explaining their many different concrete services in more detail.

Among the many different concrete solutions that the company offers include concrete walkways, stairs, and driveways. The company is so good at installing these concrete features that they do not limit their customers in any way regarding shape or size and they also cater to the concrete needs of both residential and commercial customers. The company representative pointed out that they are experts at doing concrete patio and pool Waldeck installations too. Concrete features such as these make any backyard easy to maintain while at the same time improving the looks of it. They can also be combined with other backyard features as part of an incredible outdoor living space. He stated that they are also one of the most reputable companies in the Oakland area when it comes to concrete foundation work. This is a critical aspect of any home or commercial building project that they have the knowledge, experience, and tools to get to this type of concrete work to come out perfect every time.

Oakland Concrete Solutions has also become one of the best in the area when it comes to stamped concrete projects and their work in this area has been getting rave reviews. Rene Shay Carson wrote, "They installed a stamped concrete patio for me, I am very happy with how it turned out and the guys were easy to work with. Thank you!" This 5-star review was taken from the company's Google Maps Business Listing. The company representative added that all of their concrete services can enhance curb appeal and they are also a long-lasting and cost-effective home beautification solution.

Those that would like to view the new website or get more details on the concrete services that this company offers can refer to <https://oaklandconcretesolutions.com/>. Oakland Concrete Solutions is also happy to provide free quotes for those that fill out the form on the homepage of the improved website.
