D.I. Auto Care Offers Mobile Auto Detailing in the Phoenix Area

February 05, 2021

February 05, 2021 - PRESSADVANTAGE -

D.I. Auto Care has announced that they are offering mobile auto detailing services in the Phoenix, AZ area. They are ready to respond to the needs of those who say they require auto detailing near me in the Ahwatukee Phoenix Scottsdale Area. With this service, car owners can their vehicle look like new with a smooth and shining paint again, with clean leather seats and carpets, and even with that new car smell. They have virtually five-star ratings on Google and Yelp and they take pride in being able to ensure that customers' vehicles are returned to them like new.

Paul, the owner of D.I. Auto Care, says, "We can have your vehicle looking like and smelling like the day you purchased it. If your vehicle has a paint that is no longer shiny and has an interior that is dirty and with an unpleasant smell, give us a call or text."

Aside from detailing services, D.I. Auto Care also provides other related services such as window tint services. This involves window tint removal and installation that is provided with a lifetime warranty. This kind

of service offers a number of benefits, such as enhancement of the privacy of the people inside the vehicle or home; prevention of the glass from shattering; blocking of 99 percent of the harmful ultraviolet radiation from the sun; reduction of the heat inside the vehicle or home; and reduction of the energy bill for cooling the home by up to 50 percent.

D.I. Auto Care does not just provide mobile detailing near me in Phoenix but also auto glass windshield replacement and repair. With their mobile auto glass repair service, they offer several distinct advantages. These include increased protection, fast recovery process, lifetime warranty, satisfaction guarantee, and a less costly repair service compared to replacement. In addition, their auto glass repair and replacement services are all insurance approved, allowing the vehicle owner to significantly reduce expenses.

Meanwhile, windshield replacement is not a simple procedure and it may also be costly. However, there are several reasons why people would want to replace their vehicle's auto glass. Naturally, windshield replacement should be considered first as it is the less costly alternative. A windshield rock chip repair may be performed to provide a solution for a rock chip. Resin is injected into the chip and then allowed to cure and dry. The result is that the outer layer of the glass windshield is sealed by the resin. However, if the damage to the windshield is too great, a windshield replacement is imperative. This involves the careful removal of the current windshield, properly removing the old urethane, gasket, trim pieces, molding, and the installation of the new windshield.

And then there is the ceramic coating service. This nano ceramic coating for cars, trucks, and boats is the latest development in auto paint protection. This is a glass-like coating that will provide the car with a deeper shine and additional protection from the Arizona sun, which may cause the car paint to fade and appear dull after a certain length of time. Other benefits of ceramic coatings include: their ability to last longer than other coatings; the fact that they can remain cleaner for longer and it is easier to get rid of water spots and bugs; less maintenance; and ability of the ceramic glass coating to make the vehicle more scratch resistant.

Customers have left highly positive reviews about D.I. Auto Care on Google. For example, Haylee J. gave them five stars and said, "Really quick and great service I would recommend and go back to him again when needed. My main concern was to get rid of the nasty smell in my car and Paul was able to do so!"

Those who require Phoenix interior detailing services may want to check out the D.I. Auto Care website, or contact them through the phone or via email. They are open any day of the week, from Monday to Sunday, from 5:00 am to 10:00 pm.
