## **D.I. Auto Care Is Providing Auto Glass And Windshield Replacement Services In Phoenix**

*March 17, 2021*

March 17, 2021 - PRESSADVANTAGE -

D.I. Auto Care is offering auto glass and windshield replacement services for customers in the Ahwatukee, Phoenix, and Scottsdale areas.

The company offers its services on all kinds of cars, trucks, motor coaches, RVs, planes, boats, and high-performance cars. The founder of the company, Paul, has been detailing cars for over 34 years. He has a 5-star rating on Google and Yelp. The company also offers services such as interior and exterior detailing, waxing, buffing, window tinting, auto glass, windshield replacement, ceramic coating, smoke removal, and ozone treatment. The company is insurance approved making the process seamless for the customer.

The company says that there can be many reasons why individuals want to replace the auto glass on their vehicles. There can also be a lot of reasons why car owners do not have to get the glass replaced but instead, a simple repair would work. Small chips and defects might not appear to be as significant to some individuals but the company warns that it can actually reduce the visibility of the driver's vision when driving

into the sun or at night. This is extremely critical for the rear window and the front windshield. The company says that visibility is critical when driving in bad weather, rain, or snow.

It is recommended that car owners should choose the rock chip repair as their first option as it keeps up the integrity and dependability of its factory seal. A windshield rock chip repair involves injecting resin that cures and dries into the chip and seals the outer layer of the glass windshield. Repairing a rock chip caused by stone damage is done in an attempt to restore the integrity, and the strength of the windshield glass and to eliminate its chipped appearance. The company says that when done by a professional, a windshield rock chip repair can leave a smooth, invisible surface. The crack is unable to spread or further cause damage to the glass windshield. The company recommends against DIY (Do It Yourself) windshield rock chip repair kits purchased from stores, like NAPA, as they may only be somewhat effective. Without the right tools and experience, DIY tinkerers may end up further damaging their chip or making it look more distracting, obstruct their view, and leave marks on their glass. The company aims to be the first point of contact for car owners searching online for "Phoenix Auto Glass Repair".

A windshield auto glass replacement is the complete removal of a vehicle's front windshield, old urethane, trim pieces, gasket, molding, and the replacement of the new windshield. The company says that when properly installed by a professional, a windshield auto glass replacement should restore the vehicle safely to its original manufacturer's standards (or better). The company strongly believes that just like windshield rock chip repairs, having a windshield replaced should be done by a professional with experience, like a windshield replacement technician.

The company says that there are recommended professional equipment needed to perform the installation successfully which DIY tinkerers may not have access to. The company gives the example of the urethane glue gun, for instance. It is a necessary tool to properly distribute the urethane glue sealant at the right temperature and exactly where it needs to go to set the windshield to OEM Standards. The company claims that auto glass windshield replacement involves the proper tools and equipment that help complete the job in a safe manner. Car owners who attempt the repairs need to be up to speed on the types of windshields such as some that have a heads-up display, lane departure, cameras, heated, condensation, and rain sensors.

The spokesperson for the company, Paul, says, "We have been performing all kinds of auto glass repair and replacement on vehicles for over 34 years. We have a 5-star rating on Google and Yelp because of the quality of our work and excellent customer service. With my experience and expertise, there is no challenge too difficult. I have worked with every car model imaginable. It makes me the go-to Phoenix windshield replacement technician that you should call if you ever need to get your car's glass or windshield replaced or repaired."
