New MoldStar Remediation Video Post: "How do Professionals Test for Mold?"

January 06, 2021

January 06, 2021 -

MoldStar Remediation, a mold cleanup and water removal company in Atlanta, GA, announced their video "How do Professionals Test for Mold". The video gives homeowners an in-depth explanation of the different ways mold professionals can test their homes. The video and a related blog post can be viewed on the company's website under the resources tab.

Having served the Metro Atlanta area for more than a decade, MoldStar Remediation separates itself from the competition regarding mold restoration and indoor air quality. The owner, Jeremy Shelton, holds certifications in Water Damage Restoration and Applied Microbial Remediation through IICRC, the top indoor environmental accreditation body. Shelton is also a Certified Microbial Consultant through ACAC, the American Council for Accredited Certification. Shelton's professional experience has made him one of the leading toxic mold experts in Atlanta.

When asked why he chose his profession, Shelton had this to say "in my early 20's I bought a home that literally tried to kill me. After nearly two years of doctor's visits and my own research, I discovered an extreme mold infestation in the home's crawl space. Since then, I've made it my mission to help homeowners who

may be suffering from mold-related illnesses by providing mold remediation, mold testing, and educational resources."

Homeowners located within Atlanta, Sandy Springs, Roswell, Marietta, or other surrounding Metro Atlanta areas suffering from toxic mold exposure are invited to speak with the MoldStar Remediation team to schedule a free consultation.

Real Estate Agents, Plumbers, Home Inspectors, and other local service businesses or licensed tradesmen or tradeswomen are invited to reach out to the MoldStar team to be featured on the resources page.
