Lifetime Family Dental Offers Services of Dentist Near Me in Kaysville Utah

January 15, 2021

January 15, 2021 -
Lifetime Family Dental is pleased to announce that those who are looking for a dentist near me in Kaysville, Utah, will likely find their dental needs can be serviced by Chris Godfrey DMD, who owns the dental office. This dentist serves Kaysville and surrounding areas like Layton, Fruit Heights, South Ogden, Centerville, and Farmington, Utah. He is experienced in oral surgery, root canal therapy, dental implants, wisdom teeth removal, and conventional dental procedures. More information about the dentist office near me in Kaysville can be gleaned from https://lifetime-family-dental-utah.business.site/#summary.

Chris Godfrey DMD, says, ?We invite you to visit our office if you are looking for a dentist office near me in Kaysville and neighboring areas. Ours is where the best patients, the best staff and the best office come together to provide a superior quality dental experience. We strive every day to create an office where patients, staff and professionals are proud to recommend us to friends and family.?

There are a number of factors that make this family dental office stand out among the others. These include: their convenient location; the fact that most insurances are accepted; pain-free family dentist services; availability of family appointments; membership plan offered for those without insurance; and availability of

emergency appointments.

Aside from being the dental office to go to for a tooth ache or issues with wisdom teeth, Lifetime Family Dental offers various services including pediatric dentistry, endodontics, dental implants, dental hygiene, dental fillings, dental crowns, and dental bridges.

Pediatric dentistry is focused on the oral health of children, from infancy until the teen years. Dr. Godfrey and staff have the qualifications and experience in caring for kids? teeth, gums, and mouth throughout the different stages of childhood. Without appropriate dental care for children, they will likely encounter tooth decay, dental abscess and other problems that can result into a lifetime of pain and complications. It is important to note that at the present time, early childhood dental caries is five times more common in children compare to asthma and 7 times more common compared to hay fever.

Meanwhile, endodontics has to do with issues regarding dental pulp and tissues surrounding the tooth root. In this particular field, they are focused on specific procedures like root canal therapy, trauma and surgery. Endodontists are capable of doing routine as well as difficult and very complicated endodontic procedures, such as endodontic surgery, root canal treatment, and special procedures for saving the teeth after traumatic dental injuries.

They also offer dental implants, which are considered to be the next best thing to healthy and natural teeth. With a dental implant, a lost tooth is restored such that it feels, look, fits, and functions like a natural tooth. Cosmetic dental implants provide a strong foundation for removable or fixed replacement teeth that are made to look like the patient?s natural teeth.

Lifetime Family Dental can also help with dental hygiene. An experience and highly qualified dental hygienist will check the condition of the patient?s teeth and gums, and then utilize effective cleaning methods and treatments to help keep the teeth clean and attractive. They will get rid of any accumulated plaque from in between the teeth and from the teeth surfaces.

Those who are complaining of a toothache will likely require a dental filling. It is one of the most common dental procedures and the professional team at Lifetime Family Dental will always ensure that the patient is comfortable during the procedure. Dental fillings are required when the tooth is cracked, broken, or damaged by decay.
