Winston Salem NC Roofing Company Announces Several New Financing Options

January 12, 2021

January 12, 2021 -
Grace Roofing and Construction, a reputable Winston Salem NC roofing company, has just announced they now have several new financing options. They have done this to help their customers avoid having to put off badly needed costlier roof repairs such as whole roof replacements. Getting those customers financial assistance when they need it has always been important to this company. This is part of their long history of being an extremely customer-centered business.

The company owner, Richard Sakowski, says, ?Let?s face it; some of the most expensive roof repairs that we do, no matter how beneficial they are, do not fit in everyone?s available budget. Some people will have an easier time getting their essential roofing services done if they can spread out the payments over time. That?s why we continue to go to great lengths to provide our customers with as many financing options as possible. We also do this because we realize that most roof repairs that get put off will eventually start to cause major leaking and other structural problems around a home.?

Sakowski went on to say that they wanted to announce these new financing options to encourage their customers to try and get approval for a low-interest loan. Many of these loans come with payment terms that can be less than $100 a month depending on the duration a customer chooses. He added that these loans also do not need a hard inquiry that can impact someone?s credit score to apply for them. The types of loans that customers can take out for the company?s roofing Winston Salem NC services include ones offered by reputable companies such as Enhancify. The company owner says that applying for a roof repair loan only involves a simple 3-step process. That includes giving a customer an accurate estimate to help them determine the amount of financing that they require, filling out a simple online lending form, then getting approval and scheduling the work.

He mentioned that they also put extra effort into getting their customers? emergency roofing needs taken care of. These services are available around the clock 365 days a year. He says that once they get a call for

emergency roofing assistance from a customer and it?s safe to go out, one of their experienced crews will quickly get to that customer and inspect their roof and assess its repair needs. While small emergency roof repairs can be done right away, larger roofing repairs often require ordering materials. The company owner says if this is the case, they will tarp the customer?s roof to help keep it as watertight as possible until the necessary repair supplies arrive. He stated that they will even help their customers with any insurance claims they file for their roofing damage. The effort they put into their 24/7 emergency roof repair services for Winston Salem homeowners has not gone unrecognized either. Anders Hagarty wrote, ?I had water coming in through our bathroom ceiling. One call relieved my concerns. They came and checked the problem and suggested ways to fix it. Excellent service. Great at keeping in touch. Performed everything they said they would. The information I received satisfied all my concerns. Great job!? This and other Winston Salem roofing reviews like it can be seen on Grace Roofing and Construction?s Google Maps Business Listing where they average a very impressive 4.9 out of 5-star rating on over 50 reviews.

According to Sakowski, in addition to emergency roof repairs, they offer a variety of commercial and residential roofing and other services. This includes whole roof replacements, leak detection & resolution, metal roof installations, and gutter & downspout installation and repairs. For people in the Winston Salem and other Piedmont Triad areas of North Carolina that need roofing work done, they can get more information on Grace Roofing and Construction?s services by calling them, sending them an email, or by filling out the form found on the bottom of their website?s homepage.
