

EPS Landscaping & Tree Service Is Fast Becoming Fort Lauderdale's Most Versatile Tree Trimming Service

January 15, 2021

Pembroke Pines, Florida - January 15, 2021 -

EPS Landscaping & Tree Service LLC has long prided itself on being one of the most comprehensive tree care services in the Fort Lauderdale, Florida area. That includes being one of the area's foremost tree trimming specialists. This service has gotten even better as they have added many new varieties of trees to the list of trees that they are highly qualified to prune. Included in this is their crew's ability to trim any type of palm tree that's found growing in Broward County. The wider variety of tree trimming tasks that they now perform is expected to help to keep this company one of the most sought-after tree care services in Fort Lauderdale and the surrounding areas.

Greg O'Connell, the company's co-owner says, "Tree trimming is one of the most essential tree care tasks that home and business owners should get done regularly. That's because tree trimming not only helps the trees in a landscape look better, it also helps trees and the vegetation that surrounds them stay healthier too. Tree trimming is also something that must be done at the right time of year and done properly so it does not harm the tree being trimmed. For this reason, it's always best to leave tree trimming to seasoned tree professionals like myself and the other crew leaders at my company."

The company owner went on to give several types of examples of the tree trimming services that they offer and what the benefits from those services are. One of the most important of which is deadwooding. This promotes tree health by removing branches that are dead, are growing in an unhealthy manner, or have become infested with insects or disease. He added there is also crown thinning which lets beneficial sun, wind, and moisture get to the interior of a tree easier and crown raising which eliminates lower tree branches to create clear pathways through a yard. It was also mentioned that tree trimming is used to shape trees to make them look better and to encourage healthy growth patterns.

The company's tree trimming services have also been very favorably reviewed by those that have used them. Bryan Cook stated, "When I called this company they came out and exceeded my expectations. I have recommended EPS to all of my friends. They are a one-stop-shop to meet all of your landscaping needs." O'Connell also talked about how important it is for his company to offer palm tree service that centers around trimming. He observed that there are few properties in Broward County that do not have at least one type of palm on the property and many have several different types. This 5-star review taken from their Google My Business profile is a testament to how good this company has become regarding palm tree trimming. Gina Maria Marin wrote, "I called EPS Landscaping and Tree Service to trim my palms ahead of the last tropical storm. Not only do my palms look fantastic, but I also didn't have to be out after the storm picking anything up from my yard. The team was knowledgeable and courteous, and customer service is exceptional. Greg and Jessica will take care of you the right way!"

According to O'Connell, their list of essential tree services does not start and stop with tree trimming either. They are also specialists at tree removal and getting rid of the stumps that this tree task leaves behind. He says that being tree care specialists they never like to see trees come down but when they grow too close to homes and power lines or a landscape gets overcrowded with them, it can be very beneficial to remove one or more of them. As an alternative to tree removal, EPS can even help a home or business owner relocate smaller trees in their yard if they are becoming a nuisance where they currently stand. The company owner talked about how they are also very knowledgeable when it comes to helping a customer select new species of trees to add to their landscape and then planting those trees for the customer.
