

Music Producer In Phoenix Contributes To New Cheyenne Faith Track

January 20, 2021

Phoenix, Arizona - January 20, 2021 -
Tempe, AZ based Phoenix Recording LLC would like to reach out to the wider public and share information about a new Cheyenne Faith song that they helped create. Cheyenne Faith recently recorded two new songs at Clearlake Recording Studios in North Hollywood, CA with CT Aletniq of Phoenix Recording as producer. The single ?Bad for Me? was written by Faith and released on all major platforms, including Spotify, Soundcloud and YouTube. It was mixed and edited by CT Aletniq in his private studio.

Phoenix Recording has a team of musicians, recording engineers and music producers who work in top studios to help artists produce their best music. They craft and provide hip hop beats and pop instrumentals for artists all around the world. Their team of music experts can make any project come to life, be it Hip Hop, Pop, EDM or Jazz. They are able to work with any budget, and they also offer financing at select recording studios.

Some people may hesitate to spend money on hiring music producers to help record their demos, mixtapes or albums. However, enlisting the assistance of music producers actually makes producing mixtapes and albums cost less and makes the music sound better. The skills and experience that experienced music

producers bring can help save a large amount of time in the recording studio. They will also make sure that all musicians brought in are prepared and rehearsed to perform in a professional recording studio environment. Proper preparation is crucial, as recordings always have deadlines that have to be met. Music producers are capable of improving and staying focused on the sound that the artist wants to achieve ? while making sure that everything is done on time. This makes recording albums and mixtapes much easier.

In addition to professional music production, Phoenix Recording also offers beats for sale on their website. All beats and files that they offer are ready for studio use and are compatible with all industry standard digital audio workstations. The beats are made using the latest technology from Yamaha, Akai, Roland, Maschine, Reason, Logic, Cubase, Waves and Pro Tools. They offer three main options for their clients: the MP3 files that cost $9.95, the WAV files that cost $19.95 and the fully tracked out versions that cost $99.95. Phoenix Recording recommends the MP3 and the WAV versions for clients who are looking to purchase bits for their mixtapes while they recommend the 24 bit fully tracked out versions for clients who are planning to use the beats for more extensive music productions. Clients who purchase the MP3 and WAV version of the beats from Phoenix Recording may instantly download all purchased files and license agreements after the transaction. For the fully tracked out beats, Phoenix Recording sends a license to their clients within 48 hours of the purchase. Clients will then receive an email containing a link from which they can download the fully tracked out WAV files. While they are waiting for the license and download link, they will also be allowed to instantly download the 16 bit stereo WAV and MP3 versions of the beats they purchased.

Clients may also request custom beats from Phoenix Recording by simply making a special request for free on the company?s contact page and giving the details of the instrumental beats. Phoenix Recording then reviews the request and gives a quote depending on what is needed to craft what the client wants. This process usually takes between 24-72 hours. Phoenix Recording also allows artists to request for modifications to beats that can already be found on their website. In some cases, these modifications can be done quickly and at a low price. Clients may also purchase beats and ask for Phoenix Recording to take it down from their site permanently.

Phoenix Recording has received great reviews for their services. Vicente A Ruiz says in a 5-Star Google review, ?Always a pleasant experience working with Phoenix Recording. Professional, insightful and very knowledgeable in the field of recording. I?ve recommended more than one person to them and will continue to do so.?

Seth Machine says in another 5-Star Google review, ?If you want that futuristic sound, this is the place to be. I've been recording over a year here, and I have been able to accomplish a lot more than I thought I ever could in music. Not only will you find your sound here, but you will grow as an artist working here!?

Artists who are looking for a professional music producer in Phoenix may check out the Phoenix Recording LLC website for more details. They can also be found on multiple social media platforms.
