New MoldStar Remediation Video Post: "Will Mold Come Back After Mold Remediation?"

January 12, 2021

January 12, 2021 -

MoldStar Remediation, a water mitigation and mold remediation company in Atlanta, GA, announced their video "Will Mold Come Back After Mold Remediation?". The video is part of a series of content in which owner Jeremy Shelton answers frequently asked questions. The video provides an in-depth explanation of how to keep mold from returning after remediation. The video and a corresponding blog post can be viewed on the company's website under the resources tab.

Having served the Metro Atlanta area for more than a decade, MoldStar Remediation separates itself from the competition regarding mold restoration and indoor air quality. The owner, Jeremy Shelton, holds certifications in Water Damage Restoration and Applied Microbial Remediation through IICRC, the top indoor environmental accreditation body. Shelton is also a Certified Microbial Consultant through ACAC, the American Council for Accredited Certification. Shelton's professional experience has made him one of the leading toxic mold experts in Atlanta.

When asked for a comment about the post, Shelton had this to say, "There's so much misinformation in the mold remediation space. Fly by night contractors claim to remediate mold problems, but if the source of what

causes the mold infestation isn't solved, the problem will return. I believe it's my job to inform homeowners and potential customers about keeping mold problems from coming back just as much as it is to solve their current problems."

Homeowners located within Atlanta, Sandy Springs, Roswell, Marietta, Soor other surrounding Metro Atlanta areas suffering from toxic mold exposure are invited to speak with the MoldStar Remediation team to schedule a free consultation.

Real Estate Agents, Plumbers, Home Inspectors, and other local service businesses or licensed tradesmen or tradeswomen are invited to reach out to the MoldStar team to be featured on the resources page.
