

Aaron Kosins MD Offers Orange County Rhinoplasty Services

January 20, 2021

January 20, 2021 - PRESSADVANTAGE -

Aaron Kosins MD, who is based in Newport Beach, CA, is pleased to announce that he is offering rhinoplasty services throughout Orange County. Dr. Kosins is a board-certified plastic surgeon and rhinoplasty specialist who bases his approach on the complaints of each particular patient with regards to his or her nose. He offers both primary rhinoplasty and secondary or revision rhinoplasty.

Dr. Kosins says, "As a graduate from the University of Southern California and the University of California at Irvine, I have had the opportunity to work with dozens of brilliant and innovative Plastic Surgeons. From that, my own brand of bedside manner and surgical technique has evolved to deliver outstanding service as well as fantastic results to my patients. If you are considering plastic surgery, please make an appointment and come see the distinct and personalized services we offer. I take my time and have a unique approach to each surgery."

Dr. Kosins is an editor of the Rhinoplasty Section of the Aesthetic Surgery Journal and a member of The Rhinoplasty Society. He is the author of various articles on plastic and reconstructive surgery. He has also popularized a relatively new rhinoplasty procedure known as piezosurgery. This method uses ultrasonic

energy to cut hard tissues such as bones while leaving the surrounding soft tissue intact. This is in contrast to the traditional method of osteotomy that makes use of hammer and chisel to literally break the bones to enable them to be moved and narrowed. Unfortunately, the conventional method sometimes results into unexpected bone fractures.

With the use of piezosurgery in Dr. Kosin's Orange County rhinoplasty, there is less bruising and swelling because it leaves the soft tissues intact. The result is enhanced accuracy and precision, and shorter recovery time. It also provides a very effective approach to eliminating irregularities and asymmetries of the bone tissue. Dr. Kosins reveals that the results for his patients when piezosurgery was used has been outstanding. His experience has been reported in the Aesthetic Surgery Journal and he has presented his results at the annual meetings of The Rhinoplasty Society in Montreal in 2015 and in Las Vegas in 2016, The World Rhinoplasty Meeting in Versailles in 2016, the 5th Open Bergamo Rhinoplasty Meeting in Italy in 2016, and IMCAS in Paris in 2017.

Dr. Kosins explains that a key goal of the rhinoplasty that he performs is to enhance the dorsal aesthetic lines, which are the lines of the nose when flash photography is used to capture the front view of a person. While establishing a good profile is one of the goals of rhinoplasty, getting a good front view is the final goal of the procedure.

Aside from rhinoplasty, Dr. Kosins offers other procedures, including breast augmentation, breast lift, facial aging and rejuvenation procedures, body contouring, and botox and fillers. Just like with rhinoplasty, his goal is to follow the patient's preferences. He will work closely with the patient to ensure that the results of the breast augmentation or breast lift procedure will comply with the patient's specific aesthetic needs.

Dr. Kosins also offers body contouring procedures like abdominoplasty or the tummy tuck. He also provides fat transfer and liposuction procedures, where he applies the SAFE Lipo technique that helps him provide a better contour for his patients. He has also found this method to be very helpful when it comes to secondary or revision cases.

Those who are interested in rhinoplasty and other plastic surgery procedures in Orange County may want to check out the Aaron Kosins MD website at <http://aaronkosinsmd.com/>, or contact him on the telephone or through email. His clinic is open from Monday to Thursday, from 8:00 am to 5:00 pm, and on Fridays from 8:00 am to 12:00 pm.
