Arrowhead Clinic Announces Opening of New State of the Art Chiropractic Office For Auto Accident Injuries in Midtown Atlanta

January 18, 2021

ATLANTA, GA - January 18, 2021 -
Arrowhead Clinic is pleased to announce that they have moved into a new, world-class Midtown Atlanta office location. This new facility is a state-of-the-art clinic that treats car accident victims, whiplash injury victims, and any other chiropractic needs. The clinic's website is at arrowheadclinic.com/georgia/atlanta/midtown/chiropractor.

Dr. James Toney, head of the Midtown Clinic said that he and the staff are very pleased with the new location. ?Our company has done well because we are completely focused on patient care. Whether it?s because of an auto accident or any other reason why someone is in pain ? we stand ready to help.?

The clinic offers free consultations and takes careful approaches in its treatment plans. Not only do they work with people who are accident victims of any sort, but they also work with people dealing with chronic pain.

The company as a whole has been in business for more than 40 years and they now have locations all over the south. Originally founded by Dr. Harry W. Brown, D.C., who opened his first Chiropractic Office in

Savannah, Georgia in 1977. Today there are 17 Chiropractic Clinics in the Atlanta, Athens, Savannah, Brunswick, Albany, and Hinesville areas.

When people search for a ?chiropractor near me,? they often do so because they have been referred by their general practitioner or by attorneys after an accident. The results that chiropractic care has been shown to provide include reductions in acute pain symptoms, reduction in inflammation, increased neck and lower back range of motion, elevated mental clarity, better sleep throughout the night, not to mention relief from injury-related pain.

There is a great deal of information available online about the Arrowhead Clinic. The company?s website or Google listings and reviews about the services currently offered and the satisfaction that current patients say they have found. The company as a whole and the Midtown clinic in particular has received positive reviews from patients.

One patient wrote, ?My experience was great. They really helped me from beginning to end. The Doctor. and Chiropractic Assistants were very professional and helpful. They were also very informative about my treatment and recovery. I would recommend this Clinic to whoever needed to seek grade A care.?

The Midtown location will continue the company?s traditional holistic approach to the care that is needed. For example, a patient's typical posture will be examined, as will bodily alignment, and the spine itself in order to determine what the cause of the pain is. Chiropractic care is non-invasive, and each patient will receive a personalized care and treatment plan. These will often include recommendations regarding nutrition, lifestyle, and even sleeping positions.

The clinic is currently open and treating patients, and there are multiple safety precautions being taken because of the pandemic. The facility undergoes regular in-depth cleaning and disinfection, and personal protective equipment is being used when it is applicable. Of course, patients are encouraged to practice social distancing and to wash their hands while at the facility when needed.

One of the reasons that chiropractor care is so successful and frequently sought is because it is not medication focused. If a patient is in pain, chiropractic care aims to help the body use its own natural healing abilities to lower pain, as opposed to simply taking a pill and hoping for the best.

The Chiropractors at Arrowhead are also generally very much proponents of patient education. Before, during, and after they treat a patient, they try to make sure that information about the situation is made available to the patient. This process begins even before a patient is seen. Arrowhead?s website spells out in great detail what a prospective patient can expect when they have their first appointment and first chiropractic adjustment.

For more information about the clinic, the services it provides, and/or to be evaluated after an accident, simply contact them at (800) 961-7246. There is also a contact form that is available on the company?s website.
