

Palmtree Cash Homebuyers Explains Why It's Better to Sell House to Investor Rather than Have It Listed

January 19, 2021

January 19, 2021 -

Palmtree Cash Homebuyers, a real estate solutions company in Fort Lauderdale, FL, wants to inform homeowners who want to sell house fast that there are six disadvantages of having the property listed and that it may be better to sell the property to an investor. They want homeowners to know that they fully understand the situation they are in and are willing to help. As such, they are willing to buy houses in any condition in South Florida and neighboring areas. There would be none of the hassles and road blocks they often encounter when listing the house and selling it the traditional way.

When selling a house through a listing agreement, it is important to realize that although some agents may be totally full-service, others will be lacking, especially with regards to marketing. The property owner may even be asked to contribute to the marketing of the house above and beyond the cost of listing the house.

Another disadvantage of listing the house is that there may be some expenses that the seller may not always be prepared for. In addition to the extra marketing that may be asked for, the home seller may end up also paying for repairs, cleaning, staging, closing costs, and expensive commissions when the house is finally sold.

The third disadvantage of having the house listed is that property showings can be cumbersome. For one, the owner may end up showing the house to a lot of people who are not really interested in buying the house. The home seller's schedule may also be abruptly disrupted by sudden requests from people who want to take a look at the property. And, of course, the house has to be prepared and cleaned before allowing someone to see it.

Fitz Thompson, a spokesperson for Palmtree Cash Homebuyers, says, "We buy houses fast for cash. There won't be any need to show the house to a lot of people, who may not really be interested in buying the house. And we accept houses in any condition, which means you don't need to spend on cleaning and

making repairs to the property.?

Another possibility is that retail home buyers and their agents may continue to negotiate with the seller up to closing. This could put pressure on the seller, who might just give in to the demands of the buyer. And the longer it would take to close the transaction, the greater the possibility of the deal falling through.

And lastly, even in a market where houses are in demand, a house may not sell. There are many reasons why a property may not get sold, such as the failure of the buyer to secure home financing, the presence of other properties that appear to be more attractive to buyers, and more.

The investors at Palmtree Cash Homebuyers want to stress that the company specializes in offering solutions to real property problems, particularly those that put a financial burden on the home seller.

They know that there are many possible reasons why a homeowner would want to sell the house as quickly as possible. These include being in danger of foreclosure, owning an undesirable rental property, inheriting a house that is not desired by the inheritor, having a vacant property that is only costing the owner due to maintenance and taxes, a property owner who is going through divorce, the inability of the owner to keep up with the monthly payments, and more.

The solution that is offered by Palmtree Cash Homebuyers is to buy the house in any condition for cash in as short a time as seven days. There would be no real estate commissions to pay and the closing costs will be paid by the company, which leaves the seller holding on to the full amount offered by the company.

Property owners who are looking for cash home buyers may want to check out the Palmtree Cash Homebuyers website, or contact them through the telephone or via email. They can be contacted from 10:00 am to 5:00 pm, from Monday to Friday.
