Launch Date For ExpressSTDtesting.Com Confirmed: March 1st, 2021

January 19, 2021

January 19, 2021 -
Chicago, IL-based Express STD Testing, an online platform that offers a quick, convenient and discreet STD Testing service, is reaching out to the community to announce that their services will officially launch on March 1st, 2021. The company eagerly invites prospective patients to visit their website to learn more about what they have to offer, including how their testing kits work, how long it takes to receive results and more.

"This is the culmination of several months? worth of work, and we expect this launch to bring awareness to how serious and common STDs are," states Jack Lombardi, CEO of Express STD Testing. He continues, "Our purpose is to bring peace of mind and reassurance to the community at a price that they can afford. We guarantee privacy, accuracy and promptness in our results. Our tests are approved and cleared by the FDA, while our testing centers are CLIA-certified and based all over the country for our users? convenience. All of these factors are essential in the discussion of, and battle against, STDs, and we aim to be as reliable and accessible as possible."

Express STD Testing?s services work in a convenient and straightforward manner. After placing an order for a specific test (which can be done online or by phone), the customer then chooses one of the company's

local locations for the same day testing visit. No appointments or previous arrangements are necessary after placing an order, and the test usually takes as little as 5 minutes. Once done, results are typically processed within 24-72 hours of the visit.

Throughout the process, the company guarantees their patients? privacy, reassures them of the safety of their tests and guarantees their satisfaction. Notably, the test will not go through their insurance. Whichever result a patient gets will not find their way to their permanent medical records, leaving them the only person who has the information about the STD testing process. Discretion is also a given, as the company notes that there will be no insensitive questions asked during a patient?s visit at the testing center. They are then free to leave after delivering their samples, a process that takes no more than a couple of minutes.

Once the sample is delivered, the test's results will be ready and available only between one and two days. These will be available through the company's secure patient login, though they also add that patients may reach out to them via phone or email to inquire about their status. Express STD Testing guarantees 100% satisfaction, so they urge concerned patients to reach out to them to have a member of their team of care advisors answer their questions and make sure they are satisfied with the services they receive.

When the results are ready, Express STD Testing offers reassurance for patients who test positive. Lombardi states, "There are doctors ready to help you cope with the results. The doctors will prescribe the right treatment for the infection and send it to pharmacies near you. If need be, the doctor can refer you to a specialist for more specialized treatment. This is a crucial time for you where you need guidance and advice, and we will be here for you to make sure that you have all of the relevant information that you need at hand."

Express STD Testing offers a broad variety of services that cover the most common STDs with great accuracy, functioning as a one-stop solution for individuals who worry about their health. Some of the most popular products sold on their site include a 10 STD Test Panel, HIV RNA Early Detection Test, Herpes (HSV) 1 & 2 Test, HIV 1 & 2 Antibody (4th Gen) Test and Hepatitis A, B, and C Tests, among several other options.

The company's website offers more details on Express STD Testing and their products. Interested parties may reach out to Jack Lombardi to follow up on any inquiries as well. Additionally, they may fill out the contact form on the company?s official site or connect with them through their social media platforms. Their website is available here: expressstdtesting.com
