Duluth Car Accident Chiropractor Shares Benefits of Chiropractic Care

January 16, 2021

DULUTH, GA - January 16, 2021 -
Arrowhead Clinic in Duluth, Ga, has posted a blog post sharing how car accident victims can benefit from chiropractic care. Auto accidents can be traumatic for the victim and their family, causing severe emotional and physical pain. Immediate medical care is strongly recommended for the victim?s full and speedy recovery. Dr. Darris Gentry, the top Duluth car accident chiropractor, advises seeking medical attention immediately after the car crash to diagnose any injuries. Chiropractic care is an effective injury treatment for victims of car accidents.

Dr. Darris Gentry has been a practicing chiropractor for many years, who treats car accident victims suffering from whiplash, back pain, neck pain, and other types of injuries. The Duluth, Georgia chiropractor cautions against visiting a primary care doctor after a car accident, who likely would not do much except prescribing a bunch of prescription drugs.

Emphasizing the need to consult with a car accident chiropractor in Duluth, Ga, Dr. Gentry asserts that a chiropractor will identify the cause of pain, hidden injuries and treat the root cause of the problem.

The best Duluth chiropractor is aware of some of the most common and uncommon injuries after a car accident. They have the knowledge, resources, and experience to diagnose misaligned joints and muscles. Dr. Gentry acknowledges the role of an experienced auto accident chiropractor in the diagnosis and treatment of injuries, headaches, stiffness, and dizziness, which are more likely to surface first after a car crash and might signal a hidden injury.

Painkillers will not treat a reduced range of motion, but a chiropractor is aware of the need for realignment of the musculoskeletal system, cautions Dr. Gentry, adding, ?Your chiropractor can target specific areas of scar tissue buildup and break it up faster to relieve some pain and allow your body to heal quicker.? The Duluth chiropractor is best known for their expertise in spinal manipulations that release anti-inflammatory substances to prevent the development of acute injuries after a car accident. Spinal adjustments are meant to reduce pain in the affected area.

Chiropractic care is designed as a safe, non-invasive, and effective treatment for car accident injuries that can reduce pain without drugs and side effects.

?Given the current opioid epidemic, we know how dangerous prescription pain killers can be due to addiction. Seeing a chiropractor soon after your auto accident will also help prevent minor injuries from worsening into severe chronic pain or other conditions in the future.?

A victim of an auto accident must see an experienced chiropractor for injuries sustained in the car crash. Arrowhead Clinic in Duluth, Georgia, boasts a team of top car accident chiropractors who are committed to the care and well-being of car crash victims.
