

## **Chase Detailing Launches Eco-Friendly Mobile Car Wash Service**

*September 11, 2015*

September 11, 2015 - PRESSADVANTAGE -

OKLAHOMA CITY, OK ? Chase Detailing launched a new mobile car wash and auto detailing service, offering eco-friendly mobile car detailing in the Oklahoma, Tulsa, Norman and Edmond areas. The Chase Detailing method uses less than one gallon of water per car. As part of the launch, Chase Detailing is also offering a corporate program that enables businesses to provide on-site auto detailing for employees.

?We?re excited to be up and running,? said Nicholas Witwer, Owner of Chase Detailing. ?Our priority is customer service, protection and caring for the environment. With every car we care for, we strive to be ranked #1 in customer satisfaction.?

Chase Detailing offers three detailing packages. Its \$100 ?Basic Detail? service includes a premium hand wash, detailing of rims and tires, inside and outside window cleaning, interior and trunk vacuuming, carpet and mat vacuuming, console, cup holder doors, vents and instruments detailed. The package also includes interior vinyl, rubber and plastic cleaning as well as UV protection. Higher level packages add such services as Carnauba Wax, Rain-X Windows, steam cleaning, leather cleaning, and interior odor elimination. The company is also able to provide leather restoration, paint sealants, premium wax, buffing of exterior swirl

marks, and more. Chase Detailing is the only detailing company in the area to provide UV protection as a standard service.

The Business Detailing service makes it possible for employers to allow employees to have their cars detailed while they are at work. The service can be a special offer that gives employees a discount off of list prices for Chase Detailing services. Alternatively, auto detailing can be a perk or reward for good performance. ?This is a great way to offer convenience and show appreciation to your employees,? Witwer added. ?You?re helping them preserve their cars? resale value.?
