

Free Homeowner Insurance Review Offered By AC Insurance Services

September 29, 2015

September 29, 2015 - PRESSADVANTAGE -

AC Insurance Services, based in West Palm Beach, FL, has recently announced that they are offering a free homeowners insurance policy review. They want to encourage as many people as possible to take advantage of this, as now is the time to review policies. They will help people ensure they have the right coverage and that all available discounts are applied to their policy.

"People too often take out homeowners insurance and never look at it again," says Pete Steiner from AC Insurance Services. "They simply stay with the same insurance company, keeping the same policy, for years and years. However, if they were to review their policy, they would likely find out that they would be able to find better coverage at a better price with just a little bit of research. And we are here to do that research for them."

The professionals at AC Insurance Services specialize in finding policies that suit people's needs. In terms of needs, they look both at what their property means to them and what their personal financial capabilities are.

Naturally, insurance for single family homes will be very different from insurance for mansions or studio apartments. As such, budget should not be the sole consideration when trying to identify the best policy.

The services offered by AC Insurance have been positively reviewed for years. "I researched all insurance company quotes for the best deal; and I found some great rates," says Scott Sternberg. "Peter Steiner beat them all from auto to property to commercial. I was so impressed with not only the rates but the customer service and the client contact."

Those who are interested in receiving the free policy review are encouraged to contact the company at <http://myacis.com/contact/>. By leaving their contact details, AC Insurance will then get back in touch with them as soon as possible. They will then review the current insurance policy details and determine where improvements can be made. This service is completely free and no obligation and is aimed primarily at showing people how and where they should be able to get better insurance.
