

Rooter Hero Plumbing Helps With Water Heater Replacement In San Mateo County

November 04, 2015

November 04, 2015 - PRESSADVANTAGE -

Rooter Hero Plumbing of San Mateo County has announced that it is providing assistance with water heater replacement while stressing the importance of understanding the new water heater standards per the National Appliance Energy Conservation Act (NAECA). They want to help people save money and protect the environment at the same time. By replacing old water heaters, both of these goals can be achieved.

Rooter Hero Plumbing's Jessica Perrault says, "The NAECA has released new standards that demonstrate the efficiency of a new water heater. The higher the efficiency is, the less energy it uses and the less it costs. As an added benefit, higher efficiency also means a lower carbon footprint. In other words, people can also protect the planet as a whole by switching to a new, more efficient water heater. We want to help San Mateo County residents make the right choice for their own homes."

The NAECA has advised all people across the country to consult with a licensed and registered plumber in order to determine whether their existing water heater should be replaced with a more efficient one. This residential plumbing company in San Mateo County is happy to discuss the available options with any resident in the area interested in improving their home's energy conservation. This discussion is completely

free and with no obligation to purchase a service. Should a customer decide that they do want to change their water heater, Rooter Hero Plumbing will be more than willing to assist them with that as well.

"As a company, we are committed to our individual customers, the community at large and the world as a whole," adds Jessica Perrault. "This is why we offer personalized services that are of the highest quality always putting customer satisfaction first. Additionally, only local plumbers are part of our network, through which we support the local economy."

Those interested in knowing more about the new NAECA guidelines or who are considering replacing their water heater may want to contact Rooter Hero Plumbing as soon as possible. Full contact details as well as explanations on their service are listed on their website on <https://rooterhero.com/san-mateo/>.
