

Coventry Invisalign Dentist Continues Cosmetic Dental Treatments During Lockdown

January 28, 2021

January 28, 2021 -

Dr Chetan Mathias, an Invisalign dentist at Verum Cosmetic Dentists in Coventry, UK, has revealed that he continues to provide cosmetic dental treatments in Coventry during the current lockdown period in England. To minimise person-to-person contact, he offers free virtual dental consultations at Verum Cosmetic Dentists, which are one of the top providers of smile makeover methods and oral health treatments in Coventry. The cosmetic dental practice utilises only the most advanced digital equipment and methods to provide comprehensive consultations with their clients, comes up with the appropriate treatment requirements, and discusses various treatment options with the client to ensure that it?s tailor-made to the individual.

More information about Invisalign aligners can be gleaned from http://www.verumcosmeticdentists.co.uk/invisalign.

Dr Mathias says, ?Imagine, how you would feel with a healthy, straight smile. We have seen time and again how our patients experience a great boost in their self-esteem and how their outlook to life takes a major

positive turn.?

He continues, ?The only issue is the lockdown restrictions due to the pandemic. But don?t worry because we can still help you get that confident smile. We provide virtual consultations so that we can check and discuss your needs online. And when you do need to visit our dental office, you can be sure that we will follow the safety protocols to minimise the risks of infection. And with the advanced technology that we use, you can have your Invisalign aligners as quickly as possible.?

Invisalign aligners are constructed from clear, comfortable and safe material and are tailor-fitted to the patient?s mouth. A key advantage is that they are practically invisible, which means that people, including teenagers, can have their teeth straightened without the need to wear metal braces.

There are number of benefits provided by Invisalign aligners. These include the fact that they are virtually invisible and are non-intrusive; less damage to gums and teeth; ability to straighten the teeth faster; the fact that a person can have a beautiful smile once again; the fact that the clear aligners can be removed and then placed back at any time; and improved self-confidence. With regards to the virtual consultations offered, more can be gleaned from a previous press release at https://marketersmedia.com/coventry-invisalign-dentist-launches-virtual-consultations-for-private-patients/88971130.

To provide a patient with Invisalign aligners, Dr Mathias employs a digital imaging system to create a three-dimensional image of the patient?s teeth. Using this 3D image, a computer software developed by Invisalign will be used to provide the recommended aligners for various stages between the present and the desired teeth locations. Each aligner will need to be worn by the patient for approximately two weeks for at least 20 hours a day. The actual length of time for the treatment will be suggested by the dentist and will depend on the difference between the positions of the teeth at the present time and the desired teeth locations to achieve that beautiful smile.

Meanwhile, aside from Invisalign, Verum Cosmetic Dentists also provides other types of orthodontic treatments, including metal braces, ceramic braces, and lingual braces. Metal braces are the conventional way of straightening teeth that are protruding, over-crowded, or crooked. In addition to these conventional metal braces, Verum Cosmetic Dentists also offers both 3M braces and Damon Braces. 3M braces provide stainless steel braces that are gain in popularity all over the world. Damon Braces are designed to be easy to clean, discreet, and very comfortable to wear.

The cosmetic dental clinic also offers lingual braces, which are also practically invisible. They are similar to the conventional metal braces but they are attached to the back of the teeth, rather than at the front to hide them from view. All of the lingual braces offered by the dental practice are custom-fitted to fit the mouth of

each patient to ensure that they will hardly notice they are there.

Those who require the services of an Invisalign dentist in Coventry may want to visit the Verum Cosmetic Dentists website, or contact Dr Mathias through the telephone or via email. They are open from Monday to Friday, from 9:00 am to 5:00 pm.
