

Dentist Offers Expertise in General Dentistry Services in Logan UT and the Cache Valley

February 01, 2021

February 01, 2021 -

NuSmyle Dental, a dental office based in Logan, Utah, is pleased to announce that Dr. Edwin Hurst, who has developed an expertise in implants, oral surgery, root canals, crown and bridge, and periodontal surgery, is providing general dentistry services and more in Logan and neighboring areas, such as Providence, River Heights, and North Logan. He began his dental career in 1984 with his father, who was also an accomplished dentist, and after 27 years, his goal is to further improve his skills and knowledge while imparting to other younger dentists what he had learned. More about Dr. Hurst and his dental practice can be gleaned from <https://nusmyle.com/best-dentist-in-logan-dr-hurst-dds/>.

Dr. Edwin Hurst says, "I worked with my father, Dr. Clyde F. Hurst, for eleven years, which was a great opportunity that I will always cherish. Like my father, my goal has been to provide the public with dental care that is not only beautiful, but will last a long time." He continues, "I have become an expert in root canals, implants, oral surgery, crown and bridge, and periodontal surgery. This allows me to provide most care right here in my office."

Dr. Edwin Hurst is a member of the American Dental Association and the American Academy of Cosmetic

Dentistry. He is also an associate fellow of the American Academy of Implant Dentistry and he has earned the highest award provided by the Academy of General Dentistry, which is that of Master in the AGD.

Dr. Hurst has been focused on expanding and perfecting the family dental services that he provides in Logan and the Cache Valley. He provides a broad range of general dentistry and family dentistry services from routine cleanings, wisdom teeth removal, treatments for tooth decay or dental abscess, to complimentary cancer screenings for the mouth, neck, and head that are included with certain services. He also uses one of the only FDA approved dental lasers in Utah. All of these have earned him the distinction of being one of the top-rated dentists in Logan, Utah.

NuSmyle Dental also offers cosmetic dentistry, fillings, crowns, bridges, implants, dentures, veneers, teeth whitening, extractions, gum treatment, and root canals. The dental office has already provided thousands of cosmetic dental procedures during the past 30 years. Being a member of the American Academy of Cosmetic Dentistry, Dr. Edwin Hurst ensures that he is always up-to-date on the latest and most effective aesthetic treatments for the benefit of his patients.

For patients who have suffered from toothache and tooth decay and required tooth extractions, the dental practice offers various remedies, including dentures. Dentures are a restorative solution and they provide some of the most life-like dentures that people will ever see. They can provide both partial or complete dentures. These can be either conventional dentures or immediate dentures. Conventional dentures are for patients who already have dentures and would like to get another set. Immediate dentures are produced and placed right after tooth extraction. Here, at least two implants are recommended for placement in the lower jaw to help retain lower dentures due to the tendency of lower dentures to move and shift while the person is smiling, eating, or doing other necessary tasks.

As a remedy for tooth decay, they offer dental fillings for cavities that are small to medium size. The filling used is a composite material composed of silica particles that are embedded in a light activated resin. This material is colored like a natural tooth and it is very durable.

They also offer dental veneers, which are either porcelain veneers or composite veneers. The composite veneers are also known as "chairside" composite veneers because they are placed and molded "chairside" by the dentist, using a tooth-colored resin material, which provides them with a life-like and attractive appearance.

Those who want to know more about the general dentistry services provided by NuSmyle Dental may want to check out their website at <https://nusmyle-dental.business.site>, or contact them on the phone or through

email. They are open from Monday to Friday, from 8:00 am to 5:30 pm.
