

NitWits Announces Proprietary Lice Comb Product Is The Most Effective Tool to Eradicate Lice Naturally

January 29, 2021

January 29, 2021 -
Salon?s OMG Nit-Free Terminator Head Lice Comb Better Than OTC Products That Are No Longer Effective Against Lice

Belmont, Massachusetts ? NitWits, the oldest premier head lice treatment service salon in the Boston area, today announced that its OMG Nit-Free Terminator Head Lice Comb is the #1 lice comb used by professional lice removal services and the most effective tool to use to treat lice naturally, by physically removing lice and nits from the scalp and hair.

The medical salon, which has been a recipient of The Best of Boston Award since 2004, is headed by school nurse Berit Pratt, RN BSN MPH, and co-founder Sonia Simoun. They and their professionally trained team of lice-removal professionals have successfully treated thousands of Boston-area clients using their own proven products that are organic and pesticide-free. In fact, according to Pratt, traditional over-the-counter lice-removal products like the ones commonly found in drugstores are no longer effective against lice.

"Over the years head lice have actually developed a resistance to lice shampoos and pesticides," she states. "Common over-the-counter lice-removal brands are effective only about 10% of the time and many of these products contain ingredients that are harmful to humans and the environment. Our many years of successfully ridding our clients of lice have found that our stainless steel OMG Nit-Free Terminator Head Lice Comb is the best tool available for eradicating lice and nits from a human host."

The OMG Nit-Free Terminator Head Lice Comb features micro-grooved teeth to catch and remove lice and nits from human hair and scalps. It is the same comb used by the NitWits team in their salon. If desired, it can be paired with the company's OMG Head Lice Conditioner Solution that contains the founders' proprietary blend of organic ingredients and essential botanical oils. The conditioner helps lubricate strands of hair for a more thorough removal of lice and nits.

"Lice can actually grasp and hold onto hair strands, which is why they're not transmitted onto headwear such as hats and helmets," explains Pratt. Our conditioner helps loosen them from hair strands and also smothers them, slowing down their movements so they can be removed faster. Both products, like all of our product line, are a safe, non-toxic, and chemical-free way to eradicate lice."

Pratt recommends wiping the comb with a damp paper towel after each pass to deposit the lice and nits and clean the teeth. After use, the comb may be placed in a plastic bag and in the freezer overnight to kill any lingering lice and nits on the teeth. Once the comb can be passed through the hair three times without grabbing any lice or nits, the hair and scalp can safely be considered lice-free.

Clients who are unsure about using the comb properly on themselves or another person can always make an appointment with NitWits for a professional removal session in their Boston-area salon. These last about 90 minutes long.

The OMG Nit-Free Terminator Head Lice Comb may be purchased via the NitWits site for $15.

About NitWits

NitWits Lice Removal is the Boston area's premier and oldest head lice treatment service salon. Headed by school nurse Berit Pratt, RN BSN MPH, and co-founder Sonia Simoun, the salon specializes in all-natural, organic, pesticide-free head lice removal treatment for children and family members affected by lice. Their

mission is to get rid of head lice and nits (lice eggs) for good for every client who visits the salon. NitWits' founders developed their own organic, pesticide-free lice treatment products to get rid of lice and nits that are based on 15 years of hands-on experience. The staff also gives educational presentations for students, parents and teachers. Treatment sessions take place in the comfort and privacy of their Belmont salon. Call 617-816-9487 to learn more or to schedule an appointment.
