

Optometrist In West Palm Beach Releases Company Overview Video

September 21, 2015

September 21, 2015 - PRESSADVANTAGE -

Lake Park, Florida based Iconic Eye Care, which has been providing eye care for area residents since 2013, has released a company overview video. The practice takes care to ensure that they stay current with the latest technology in the office, and when dealing with patients through their various social media accounts. The released video outlines their vision and gives a general overview of the practice. It also provides current and future patients a look at the practice and the services that they provide.

Dr. Adam Ramsey of Iconic Eye Care states, "We believe in putting forth extra effort in everything we do. Our patients are our number one concern and we take great strides to ensure that each is well cared for and completely satisfied with our services. Our entire staff is dedicated to our patients."

The practice handles a number of general optometry issues, including macular degeneration, how diabetes can affect eyesight, and provides routine examinations, contact lenses, and other vision services. Their website offers information regarding certain eye diseases, as well as appointment scheduling, and other information about general eyesight.

"Iconic Eye Care has the best eye doctor in West Palm Beach," states one patient. "Honestly, I wouldn't trust my vision to anyone else."

The practice offers expanded hours as needed to accommodate the needs of their patients. With regards to a general optometrist West Palm Beach has several. Dr. Ramsey, however, states that they put all of their efforts into caring for their patients. "This is why we created the video," he states. "We wanted our patients or potential patients to see how we operate, who we are, and the level of service that we can provide."

The newly created video can be seen on the practice's website or via YouTube, and offers an insight into the practice and how they have become one of the most trusted eye care centers in the region.

Dr. Ramsey, who was born in the Caribbean, graduated with a degree in health education from the University of Florida, with Cum Laude honors. He obtained his Doctorate of Optometry at Southern College of Optometry in Memphis, Tennessee.
