

## Back to 30 Offers Microneedling for Non-Invasive Skin Rejuvenation

*February 05, 2021*

February 05, 2021 - PRESSADVANTAGE -

Back to 30, a medical spa based in Greenville, SC, is pleased to announce that they are offering microneedling as one of their non-invasive rejuvenation procedures. This is a non-surgical tool for stimulating the skin's natural ability to heal, with the result being the improved texture and appearance of the skin. It may be used to treat a broad range of issues with the skin, such as wrinkles and fine lines, large pores, pigmentation issues, and acne scars. It may be used to treat not just the face but practically all areas of the body, such as the chest neck, legs, hands, abdomen, back, and arms.

A spokesperson for Back to 30 says, "With microneedling, you can address a range of cosmetic concerns without the need for surgery or any downtime. It offers significant advantages over other forms of non-invasive skin rejuvenation, such as the fact that: it is suitable for all skin types; it is low risk; there is only minor discomfort; and it can dramatically make the skin appear younger and reduce cosmetic blemishes."

Back to 30 is a medical spa that is focused on being the best provider of non-invasive aesthetic solutions and

hormone therapy in the US. They have several locations in South Carolina, such as Greenville, Boiling Springs, and Simpsonville. There are a number of factors that make them stand out among the crowd in Greenville and surrounding areas. These include the fact that they: use the most advanced technology available; have performed more than 300,000 injections; use computerized facial analysis during the first consultation with a client to establish a personalized treatment plan; are in the top 1 percent nationally among all Allergan accounts in the US; are the first to perform a number of advanced treatments; and offer the best possible service. More about Back to 30 and their services can be gleaned by following their Facebook page.

Aside from microneedling, Back to 30 offers a wide range of services. These include body sculpting; fat dissolving injections; skin tightening; treatments for skin texture and tone; vitamin injections; men's services; treatments to smoothen fine lines and wrinkles; treatments to plump, restore or enhance volume; and more.

Another popular treatment for fine lines and wrinkles that can be provided by Back to 30 is Botox. This treatment is popular because it offers fast treatment, fast recovery, and fast results. Most Botox treatments can be done in just 10 minutes, people can get back to all non-strenuous activities immediately after treatment, and most patients can see results after a few days.

They also offer XEOMIN®, an alternative to BOTOX® Cosmetic. It can be used to treat: crow's feet; moderate to severe frown lines; smile lines at the eye corners; forehead wrinkles; lines on the neck; nasal squint lines; and perpendicular lines between the brows, which are also called glabellar lines.

They also offer Ultherapy®, which is the only FDA-approved non-surgical treatment method for lifting and tightening the skin with ultrasound technology. Using ultrasound imaging and ultrasound energy, the highly trained medical practitioners at Back to 30 are able to view and target particular layers of the individual's skin tissues. Ultrasound therapy works by stimulating collagen production, which may result in the gradual lifting and tightening of the skin over time, with the result that wrinkles, lines and loose skin are reduced.

They also offer lip fillers and other customized injectable treatments, including JUVÉDERM® Ultra XC and JUVÉDERM® Ultra Plus XC. These fillers can subtly augment the lips, thus providing greater definition for the lips and making them appear younger in just one quick appointment. Dermal fillers can result into fuller lips and there is no recovery time needed.

People who are interested in learning more about microneedling, other skin rejuvenation treatments, and other services offered at Back to 30 may want to check out their website, contact them on the telephone or via email. Those who need to know their exact location and other vital information about the medical spa can check out their GMB listing.
