

Diaper Station Kit Considered A Baby Essential By Moms According to Reports, Announces 3 Bees and Me

September 20, 2015

September 20, 2015 - PRESSADVANTAGE -

3 Bees and Me proudly announced that they have received many reports and reviews stating that their diaper station kit is now considered a baby essential by moms. The company has been given so many positive reviews from parents stating how the product has helped them to have an easier and more fun parenting experience.

"First and foremost, we would like to thank everyone who has supported our awesome and elegant-looking changing pad station. We are very happy to know that we are now considered a baby essential by a lot of moms out there", says 3 Bees and Me representative, Holly James. "This is very important for us because we consider moms our target market. We want them to have a better experience when it comes to diaper change."

This diaper clutch with changing pad is now one of the baby products at Amazon with so many positive reviews. In a review by Naomi Wade, she wrote: "I was really impressed with the 3 Bees & Me Portable Diaper Changing Pad Station from the time it arrived in the mail. The changing station came in very nice packaging (a black drawstring bag) and the black and white chevron pattern is awesome (my favorite). This

changing station has everything and more. I have a toddler and a baby so I'm always changing diapers. I hate carrying my diaper bag around as well as the babies so this is just like an oversized wallet and it's so light and easy to carry (I can place it around my wrist or attach it to the car seat/stroller). It is made of waterproof vinyl so it is super easy to clean...you just wipe it off.?

As stated in the review above, this clutch boasts a Chevron black and white pattern that is gender neutral. It has an expandable mesh pouch to house various baby essentials such as diapers and wipes. In front of the clutch is a zippered pocket where parents can put in their keys and money. It also has a wrist strap that can be attached to a stroller. The pad itself is large enough to accommodate big babies. It has a unique wing design that is not seen on other brands. Both the clutch and the pad is made of vinyl waterproof material that is easy to clean and sanitize.

To be considered a baby essential is good news for 3 Bees and Me. With the amount of good reviews they have received so far, it is no wonder why many are enticed to get this diaper clutch. It is still available at Amazon.com.
