

TinyFrog Technologies Recognized as a Top Global B2B Agency

February 08, 2021

February 08, 2021 - PRESSADVANTAGE -

TinyFrog Technologies, a San Diego web design & development agency, announced today that it has once again received recognition as a Top Global B2B Agency by Clutch.co.

This award places TinyFrog in the top 1% of businesses reviewed by Clutch, a Washington D.C.-based ratings and review firm. Clutch connects small and medium businesses with their best-fit solutions through their industry-leading research into the B2B sector, highlighting outstanding companies with their coveted awards.

The Top Global B2B award is only offered to the highest-ranking 1000 companies worldwide, making it Clutch's most exclusive award. TinyFrog's top-tier status is based on their superlative performance in 4 criteria. These criteria cover an array of factors including brand reputation and market visibility, the type of clients TinyFrog works with, quality, number and recency of verified reviews, and their expertise in the services they offer. This unique algorithm results in only the most accomplished B2B companies rising to the top.

TinyFrog Technologies works with clients in multiple industries across the United States, specializing in WordPress website design and development. TinyFrog's approach to B2B web design combines conversion optimization and user experience with compelling aesthetics, creating a strong web presence for their clients in today's competitive market.

"It's an absolute honor to receive this award for the third year running," said Jessica Kohley, TinyFrog's Marketing Director. "We're dedicated to helping businesses expand their marketing through eye-catching websites that effectively connect them with their ideal clients."

This award is the latest in a series of accolades from Clutch for TinyFrog, including being acknowledged as one of California's Best B2B companies for 2020. TinyFrog was also named one of TopDeveloper's Best WordPress Development Companies in April 2020. TopDeveloper is a reputed research and analysis platform focussing on B2B IT service providers.
