

Akron Roof Repair Contractor Releases Their Highly Informative 2021 Roof Replacement Guide

February 10, 2021

Akron, Ohio - February 10, 2021 - PRESSADVANTAGE -

TK Roofing & Gutters recently released one of the most informative guides that one will find on the subject of roof replacements. It's a guide that should prove to be an invaluable resource for those with aging roofs and others that are contemplating whether or not to bypass temporary repairs and get a more reliable whole roof replacement. This family-owned company has over 15 years' experience doing roof repairs and replacements and they poured much of that experience into this comprehensive roof replacement resource.

Daryl Gentry, the owner of TK Roofing & Gutters, stated, "Many people firmly believe that a roof is the most important structural feature on any home. That's because if it fails and leaks it will not only impact a home's other structures but the contents inside it too. This possible scenario often makes it difficult for homeowners to choose between small repairs and costlier roof replacements. That's the very reason that we decided to help with these decisions by releasing "The Complete 2021 Roof Replacement Guide". For those in the Akron area that are still contemplating their roof repair or replacement choice even after reading our new guide, they are more than welcome to call us and schedule a free roof inspection."

Gentry went on to say that they left nothing important out when it comes to the information contained in their new roof replacement guide. He even playfully apologized for the length of it. The guide starts with an overview of its contents and then proceeds into a section that discusses whether or not a homeowner should repair or replace their roof. It gave important signs as to which might cause a homeowner to lean one way or the other. Other important sections in the guide include "How much does a roof replacement cost?", "What affects the cost of a roof replacement?", and "Can you put a new roof on top of an old roof?". There was even a section in the roof replacement guide that describes the different types of roof covering options and which of these lasts the longest. The guide ended by going over such related topics as "How do I get the best deal on a new roof?", "Can I Replace My Roof Myself?", "Will My Insurance cover the cost of a new roof?", and "How do I choose the best roof replacement company?".

TK Roofing & Gutters 2021 Roof Replacement Guide can be seen in its entirety at <https://www.tkroofingandgutters.com/roof-replacement-guide>.

Not only does the company have the knowledge to write a detailed guide about roof replacements, but they are also experts when it comes to doing them. Gentry acknowledged this is one of their most requested roofing services. This is because of the thorough way that they approach this type of roofing task. The roof replacement process that they use starts with a careful roof inspection followed up with giving the customer a detailed and accurate estimate for the job. He says they will next remove the old roof covering and underlayment. At this point, a second inspection is now performed on the exposed roof structure to make sure there are no concerns with it. The company owner remarked that next comes a new layer of insulating underlayment followed by the customer's roof covering of choice. To finish the roof replacement, new leak preventing flashing is put in place around chimneys and vents and a thorough cleanup of the property is done.

Gentry reminds that in addition to whole roof replacements, they do all sorts of major and minor roofing repairs and they are one of the most recommended companies in their area for gutter and downspout repair and replacement services. They even offer rapid responding storm damage repairs for roofs that have become compromised due to severe weather or other unusual events. He says his company will even help their customers with any roof insurance claims they have that stem from these events. Those interested in learning more about TK Roofing & Gutters services can contact them by phone, email, or by filling out the form that's found on the 'contact us' page of their website.
