ServiceOne?s Omaha Nebraska Open House Will Showcase the Future of Home Heating and Cooling

February 15, 2021

February 15, 2021 -
ServiceOne has partnered up with Mercury Builders on an innovative model home that uses Daikin Ductless systems to showcase the potential of personalized heating and cooling options. The Daikin Ductless Model Home Open House in Omaha Nebraska, is scheduled on Saturday and Sunday, 20th and 21st of February, from 1 PM to 4 PM at 10213 S, 180th Avenue Circle, Omaha.

There is also a giveaway through a raffle drawing for two lucky winners. On the 20th of February, ServiceOne will be giving away one free 1-year home warranty of $565 value. On the 21st of February, ServiceOne will be giving away one free whole-home air purification system plus installation of $810 value. The draw requires visitors to come in and register at the open house.

Due to the ongoing pandemic, precautions are being taken to make the event safe for every visitor involved. The company requires masks to be worn inside the home. They will have hand sanitizer stations set up. The company also plans to keep traffic within the house to a minimum to help maintain social distancing.

The home is a showcase for Daikin, the world leader in ductless systems. Daikin has earned its reputation because of its innovations and broad product offerings that provide flexibility in installation. Consumers can choose from ceiling-mounted, wall-mounted, or floor mounted units. There are also slim duct units that are worth consideration. The heating and cooling system on display allows the homeowner to create a comfortable ecosystem, with room-to-room climate control at their fingertips. The efficient heating and cooling mechanism eliminates hot and cold spots throughout the home, saves money on utility bills, and improves indoor air quality.

When asked about the benefits of the ductless system, Jeff Churchill, VP of ServiceOne, says, ?Ductless systems are different in that you do not have ductwork, the best thing about that is you can several separate comfort areas or zones in the home. Each area of the house can have its own zone, which results in greater

comfort and efficiency. We encourage people to come and check out the model so people can see for themselves the Ductless Difference.?

ServiceOne is a company operating in the Omaha/Council Bluffs metro area in Nebraska, and Dubuque, Iowa. It offers residential and commercial installation and repair services for various home systems such as heating, cooling, geothermal, plumbing & drains, appliance repair, electrical service, generators, and indoor air quality.
