

EPS Landscaping's Irrigation Services Proven to be Impactful for Weston FL Property Owners

February 17, 2021

Pembroke Pines, Florida - February 17, 2021 - PRESSADVANTAGE -

Pembroke Pines based EPS Landscaping & Tree Service offers a wide variety of lawn and overall landscape maintenance services. One of their most popular services has become helping those in Weston, Florida, and other Broward County areas with the design and installation of effective irrigation systems. These systems are enabling more home and business owners in the area to establish and maintain healthy and greener looking lawns.

"We have been in the landscaping and tree care business long enough to know that sunlight and rain are essential when it comes to establishing healthy and beautiful looking grass and other vegetation in a yard," says Greg O'Connell, the company co-owner. "But we also realize that too much sun and too little rain become a big problem for any landscape setting. These are conditions that often visit our area of Florida and the best way to overcome them is with a properly designed irrigation system."

O'Connell went on to say that his company has the expertise necessary to design and install an irrigation and

lawn sprinkler system that will make a huge impact on any landscape. They don't just show up at a customer's site and start digging and installing an irrigation system either. All of their sprinkler system installations start with a thorough lawn survey. He says that one of their irrigation experts will go to a customer's home or business and run some tests which will help determine how to best section a customer's lawn into irrigation zones. This professional landscape company offers more basic irrigation systems but they recommend their customers buy more advanced full-featured irrigation systems that come complete with rain sensors. The company owner stated that this will help their irrigation customers avoid such unwanted consequences as lawns that are overwatered, underwatered, watered unevenly, and have become mushy. These advanced irrigation systems largely eliminate inefficient water use too. He added that modern sprinkler systems are much less invasive to lawns than they were years ago. Nowadays they require such little digging that a customer will hardly notice an installation crew was there once they have been put in place.

According to O'Connell, his company not only designs and installs irrigation systems but they also are very good when it comes to maintaining and repairing them. He mentioned that even though they use irrigation products that are made by the most reputable countries in the industry, it's inevitable that some will fail over time. When that happens they are there to help.

O'Connell reminded that they at EPS Landscaping & Tree Service do a lot more than just install impactful lawn irrigation systems. The company is also very proficient when it comes to doing a wide variety of landscape design and installation services. He stated that this includes poolscapes, outdoor living spaces, and the building water features. They offer such essential tree services as planting, trimming, and tree & stump removal too. The company owner mentioned that his company is also well-known for its lawn mowing, edging, and fertilization services. EPS Landscaping & Tree Service even offers yard maintenance plans that include several of their essential landscape services bundled together.

This company's irrigation, landscape, and tree work are also very well-reviewed by those that have used their services. J.C. stated, "Highly recommend!!! Great folks to deal with. Very professional, easy to deal with, punctual, and great fast work. Also, very detailed and the work is done for a great price!! Will be using for all my other properties and my other family properties as well." Angel Padron wrote, "I am very happy with this company; they are responsive, professional, courteous and do great work. I definitely recommend them!" These reviews were left on their Google Maps Business Listing where they average a perfect review score of 5 out of a possible 5-stars.

Broward County home and business owners that are interested in the irrigation and lawn sprinkler services that this company offers can call them, send them an email, or fill out the "request a quote" form that's

found on their website under the description heading for this service.
