

Secure FTP Site BrickFTP Becomes the New Market Leader with Lower Prices

May 05, 2015

May 05, 2015 -
West Hollywood, CA ? BrickFTP announced today it has become the newest leader in cloud-based secured FTP hosting, with more than 1,000 customers worldwide. The company?s commitment to keeping prices lower than the competition reflects its dedication to providing businesses of all sizes with world-class services. As part of its new pricing scheme, BrickFTP offers secure FTP hosting services for as low as $0.25 per stored gigabyte.

BrickFTP is the server of choice for a wide range of customers, from small and mid-sized regional companies to widely-recognized global entities. With BrickFTP, these businesses gain their own secured server, enabling safe and seamless delivery and reception of files to and from co-workers, clients and vendors. Secured with military-grade AES encryption, the flexible per-folder, per-permission access to files also includes ?upload only? modes and other restrictive defaults keeping information safe and secure at all times.

Unlike their competitors, BrickFTP provides industry-specific features that address the hosting and security needs of different markets such as medical, architecture, graphic design, accounting, plumbing and more. Granular permissions on users and groups, enforced SSL, comprehensive audit logging, improved sharing

capabilities, advanced notification features and the ability to handle files as large as 40TB in size are just some of the innovative solutions BrickFTP provides its customers.

With full 100% website interface capabilities, BrickFTP customers are able to maintain brand awareness, using their logo, color scheme and unique CSS files on all communications, with no trace of BrickFTP.

To take advantage of BrickFTP?s new lower pricing, businesses are invited to ?test drive? the services with a 30 day free trial. This trial is a guaranteed offer that provides the full range of features, with no risk and no up-front credit card information required to sign up.

BrickFTP offers three business plans: Business, Business Extra and Business Max to meet the specific needs of companies. All plans include upgrades and downgrades at any time. Businesses that pay for services on an annual basis receive additional discounts in pricing. Services may be canceled at any time without hidden fees.
