

EPS Landscaping & Tree Service LLC Announces New Coral Springs Lawn Services

March 03, 2021

Pembroke Pines, Florida - March 03, 2021 -

EPS Landscaping & Tree Service LLC, a Pembroke Pines, Florida company, has announced that they are now offering new lawn care services for those in the Coral Springs area. The company recently announced that they are expanding their services and their service areas, to now include those in Coral Springs, as well as other areas throughout Broward County.

A complete look at the services offered by the lawn care company can be seen by visiting them online at <https://epslandscaping.net/lawn-care/>. Greg O'Connell, a spokesperson for the company says, "We are pleased to now be offering a full range of lawn care to our friends in Coral Springs. To us, lawn care means much more than just yard mowing. We include a full suite of services from mowing to trimming, lawn maintenance, fertilization, insect control, and fungus treatment, among others. Our goal is for our customers to have the most pristine and most beautiful lawns in their neighborhood."

O'Connell continues that in order to meet their high levels of quality service, the company employs only the most professional and talented lawn care technicians in the area. In addition, they provide these services using the highest quality of lawn care tools available, and always go out of their way to ensure their customers' complete satisfaction with every job done.

"The simple truth of the matter is that if we are not providing quality services to satisfied customers, we do not have a business to run," says O'Connell. "Our goal since we first began has been to give our customers the lawn care service that they expect, and this most recent expansion into Coral Springs is just one more way that we can help to make that happen."

O'Connell adds that their services also include comprehensive lawn care packages that are built for each customer's needs. He states that while some customers may simply need mowing and weed trimming, others may need to add fertilization to help their lawns grow or pest control to rid those lawns of ticks and

mosquitoes. He says that customers in the Broward County area are welcome to call the company to speak with a specialist who can help them to determine what specific services are best for their individual needs.

EPS Landscaping & Tree Service LLC is relatively new to the area but O'Connell says that has not stopped them from being busy. Given that Florida rarely sees snowy winters, he adds that most homeowners want their lawns to look healthy and pristine year around, and he says that EPS can help with that.

The company offers a full range of services that are designed to give customers the beautiful, lush landscapes that they want. He adds that they offer their services on a personal and commercial level, so homeowners or business owners who have lawns that need to be maintained can contact the company for a service quote.

Customers have flocked to the EPS website to give their feedback on the services that they have received, most of them praising the team for the beautiful landscaping work that they have done and stating that they will definitely continue using EPS for all of their lawn care needs. Customers state that reasons for their return include the professionalism that that company shows, the overall quality of work that they received and the price for services, which most agree is well below what they expected for such a high level of lawn care.

Those in the Coral Springs area that may be interested in learning more about EPS Landscaping & Tree Service LLC, can contact them on their website to schedule a lawn care consultation. The company currently serves home and business owners in Coral Springs, as well as Fort Laude, Hollywood, and Pompano Beach and states that they may continue to expand into other areas as their business continues to grow. O'Connell urges those with any lawn care need to reach out to EPS today to schedule a consultation with one of their lawn care specialists.
