March 03, 2021 -
Industry Certification Establishes New Standards for Collision Repair

Rallye Coach Works of Englewood is now a certified collision repair shop, which ensures customers that their collision repairs will adhere to the latest industry quality and safety standards. This new certification guarantees that collision repairs will be performed according to the manufacturer's repair protocol by a properly trained and qualified technician, using the correct tools and equipment for the job. This certification was provided by Assured Performance Collision Care of Aliso Viejo, California, a nonprofit consumer advocacy organization that promotes automotive safety within the collision care industry.

The new certifications for Rallye Coach Works come with industry recognition by the top automotive manufacturers including Alfa Romeo, Assured Performance, FCA, Hyundai, and Kia. Rallye Coach Works is now an integral part of the most advanced repair capable and efficient collision care network in the world.

"The technical complexities of today's vehicles make it more critical than ever to choose a body shop wisely. We take pride in our highly trained technicians, who use the latest tools and equipment to deliver a top-quality repair; they provide the very best in customer service," said Anthony Martins.

The automotive collision repair certification process is rigorous; less than 5% of all body shops in the U.S. are able to meet the stringent requirements imposed by the manufacturers to ensure quality and safety in their repairs.

"Newer vehicles are manufactured with durable, lightweight materials and advanced technology, which means that a repair performed in accordance to the manufacturer's specifications is more important than ever and ensures the safety and proper performance of the vehicle," explained Scott Biggs, CEO of Assured Performance Collision Care. "Consumers need the confidence and peace of mind to know their vehicle is being repaired by a shop that has what it takes to ensure vehicle safety. We have certified more than 3,500 shops across the country to make sure consumers can have their vehicle repaired by a certified shop wherever they live, work, or travel."
