

New Services Announced For Pest And Termite Control On The Sunshine Coast

September 21, 2015

September 21, 2015 - PRESSADVANTAGE -

Minyama, Queensland based pest control company, Zero Pest & Pest Control, has recently announced a new suite of services for pest and termite control for home and business owners. The company pointed out that since most insects are attracted to moisture and warmth, they are more active during the warmer months.

"Ants, termites, and cockroaches are much more active during the spring and summer months," states Mick Kinnear, spokesperson for Zero Pest & Pest Control. "This time is a particularly busy time for pest managers with most pests on the move. We recommend that our customers book in early to avoid disappointments in having to deal with pests when they arrive. We offer comprehensive termite control Sunshine Coast consumers and businesses need."

The company uses the latest and safest up to date chemicals and equipment for use in kindies, hospitals, nursing homes, and other facilities. They offer services from Caboolture to Gympie, and provide customers with a free quote for services prior to beginning pest control.

"We have a great reputation for customer service," states Mick Kinnear. "We offer free quotes to let our customers know the cost upfront, so there are no surprises when we visit." The company believes that a free quote eases worries for customers about the total cost for eliminating unwanted pests, and that they offer quotes to homes and businesses that deal with a number of rodent and bug issues.

The company specializes in pre-purchase inspections for those looking to purchase a new home, and guarantees a 17 page report with photos delivered the same day that the inspection is done. They offer pest control Sunshine Coast residents need for cockroaches, spiders, ants, silverfish, midges, rats, mice, and other rodents or pests. Mick Kinnear goes on to say that the company is always happy to offer customers tips on how to make their homes or businesses less attractive to termites.

Those who need more information about termite protection Sunshine Coast residents would like to have, or for any pest control needs, can learn more about the company, including a complete list of pests that they offer services for, on their official website.
