Emergency Dentist Walton on Thames Receives Great Review from A Dental Patient

March 10, 2021

March 10, 2021 -
Walton Dental Surgery, a dental office in Walton-on-Thames, UK, which remained open during the pandemic lockdown, is happy to announce that they have received a great review from a dental patient. Since dental service is an essential service, they remained open during the lockdown while following relevant health protocols. The recent Google review was made by a patient who had problems with abscesses and wisdom teeth.

In the above-mentioned Walton Dental review, Kerrie D. gave the dental office five stars and said, ?Absolutely amazing. Very friendly and welcoming. I booked an emergency appointment here at the beginning of this month due to having terrible issues with my wisdom teeth and abscesses. They saw me early that same day and have done a very good job at getting me back to normal. I'm usually a nervous patient when it comes to dentists. However, here it's a different environment. Very upbeat. Thank you, Walton Dental.?

Walton Dental Surgery is committed to providing high standards of service, which is evident in all layers of the dental practice, such as the technical amenities, dental equipment, up to their fully qualified and trained staff. Teresa Kayne, Dental Practice Manager at Walton Dental, says, ?We have been receiving positive online reviews from our patients on Google as well as Facebook. Nevertheless, we are elated to announce that we have received another five-start review, this time from Kerrie D., who came to us with issues about her wisdom teeth and abscesses. We are always glad to receive such kind of reviews because not only do they help us maintain our good reputation, but they also tell us that we are on the right track towards our goal of providing the best possible service.?

Meanwhile, the dental practice continues to offer patients with a range of dental services during the current lockdown, as reported on a previous press release that can be accessed at https://www.pressadvantage.com/story/41631-emergency-dentist-in-walton-on-thames-offers-teeth-whitening

-during-lockdown. In that release, they revealed that they continue to offer teeth whitening, including other dental services. They assured patients that all of their staff are knowledgeable on the appropriate way to offer dental services while making sure that patients and everybody are safe by following the proper protocols.

They also want to point out that they have all the dental solutions available, including the services of an emergency dentist. They also want to emphasise that toothache or dental pain is a clear sign that something is wrong and they encourage anyone suffering from it to have it checked and get it treated by a dentist. The most common reason for a toothache, or pain that is felt in the area of face and jaws, is tooth decay. Other potential causes are ulcers, gum disease, cracked fillings, and inflammation around erupting wisdom teeth. Fortunately, they can offer the appropriate solution. Patients will undergo diagnostic tests, such as x-rays, to determine the reason for the dental pain.

Walton Dental Surgery also offers orthodontics, cosmetic dentistry, dental implants, and various dental services. The orthodontic treatments they provide include Invisalign, Six Months Smiles, and traditional fixed braces. Six Months Smiles is an alternative to conventional adult metal braces. It is an award-winning tool that makes use of white wires and clear brackets. On the other hand, Invisalign offers clear brace aligners, which have the advantage of not altering the patient?s appearance and are minimally intrusive.

For cosmetic dentistry, they offer smile makeovers, teeth straightening, teeth whitening, white fillings, dental veneers, teeth bonding, gum contouring, and dental implants. Other dental services include dental hygiene, dental crowns, dental bridges, dentures, dental inlays or onlays, and tooth extraction.

Those who are interested in learning more about the dental services offered by Walton Dental Surgery in Walton-on-Thames, UK, may want to check out their website at http://waltondental.co.uk/emergency-dentist/, or contact them on the phone or through email.
