

## Revitalize You MD Announces New Treatment For Frown Lines

*March 15, 2021*

March 15, 2021 - PRESSADVANTAGE -

Roswell, Georgia based Revitalize You MD would like to reach out to Roswell residents who may be in search of an effective treatment for frown lines. Revitalize You MD's Botox for Frown Lines service has been proven to be very effective in the treatment of frown lines and other visible signs of aging. Using a trusted, high quality formula, the spa helps clients get rid of every unwanted line and firm up loose skin.

Botox is one of the most popular, non-invasive cosmetic procedures on the market, and Roswell residents are never more than one call away from a professional Botox treatment. "When you work with Revitalize You MD, you're working with a plastic surgeon team that knows how to create optimal results for injectables and more," says Revitalize You MD. "Time and age affect us all, and no amount of skin care can stop the fine lines, crow's feet and forehead lines from coming when they do. With just a single treatment or more with Revitalize You MD, the premier home of Botox in Roswell, you can reclaim the youth you've always loved."

Revitalize You is the trusted Botox clinic for Roswell residents. The medical spa's team of highly trained Botox specialists is always ready and willing to answer any questions a client may have about the process in order to ensure that they are comfortable and well informed before any procedures are initiated. Botox, when

used correctly, is perfectly safe and has few to no side effects. It is derived from bacterium known as clostridium botulinum which, on its own, may be harmful but undergoes a series of processes which make it a safe, effective cosmetic product that has helped millions around the world reverse the signs of aging. Botox is regulated and administered by certified and trusted aestheticians, and one can be sure they are in safe hands at Revitalize You MD. The spa's GMB posts are one way to find out more about what receiving treatment at Revitalize You MD might entail.

One of the concerns many people have about Botox is that it is addictive. Revitalize You MD assures patients that Botox does not have any addictive properties. They add, "There are also no psychoactive ingredients involved in the making of this injectable. As such, it's impossible to get "high" or experience similar effects from Botox. Botox is a protein specifically made for cosmetic and medical purposes, and while the amazing results from Botox can be addicting, the injectable itself doesn't cause any actual dependency or promote any addictive behavior."

Another concern people have is that Botox is painful and uncomfortable. The trained specialists at Revitalize You MD know how to make the procedure painless and go to great lengths to make sure that every client is comfortable - which further reduces the likelihood of them experiencing any sort of discomfort (besides a slightly pinch when the needle goes in). Assuming it is administered by a professional, Botox should be perfectly painless.

A number of Roswell residents have gone to Revitalize You MD for Botox treatments, and the vast majority of them have been very pleased with their experiences. Amber Wix's 5-Star review on the Google platform says that she, "Found RYMD on Facebook and decided to get some Botox from them." The review continues, "Dr. Lucy made me so happy! She understood my vision for the look I was trying to achieve, and I will [not] let anyone else touch my face. I'm now getting some microneedling procedures done now from her, and my face looks better than ever. Love these ladies! Dr. Lucy, Rachael and Nurse Gee have me looking like a million dollars! My boyfriend is buying flowers again!"

Another client who got Botox done at Revitalize You MD had high praise for the spa in their own 5-Star review. It reads, "Been avoiding Botox for years because I thought the results look ridiculous. Revitalize You MD must be doing something right. My results look incredibly natural while looking better than my older self!"
