

Diamond Rock Spring Water Delivery Announces Updated Delivery Areas

March 12, 2021

March 12, 2021 - PRESSADVANTAGE -

Diamond Rock Spring Water in Ridgefield Park, New Jersey is a water bottle and cooler delivery service that provides exclusive delivery areas in the state. Founded in 1994, the family owned and operated company provides residential and commercial customers with spring water and K-Cup deliveries and pick up services in Hudson, Essex, Union and Bergen Counties.

Richard Picinich, a representative for the company says, "We take pride in offering our customers not only the best spring water available but also K-Cups featuring Green Mountain and Keurig single serving brewers. We can provide home or office delivery, or customers can take advantage of our warehouse discount pick up pricing. We take pride in our delivery service and deliver according to your schedule."

Picinich says that the company understands the importance of clean drinking water. The spring water that they collect comes from a natural spring in a specific region of the Kittatinny Mountains in New Jersey. This particular area is federally protected by land preservation and the water that comes from it has been

government tested, as well as FDA approved and is licensed by the New Jersey State Department of Health. Customers can check out the GMB location to see if they are in the delivery area of the company.

The company provides three and five gallon water bottles for water coolers, in addition to their waterline filters. Single gallon cases are also available, as are single water bottles in 8 ounce and 16.9 ounce sizes and 1 liter and 1.5 liter bottles.

?Our prices really are the most competitive in the area,? says Picinich. ?And we want to help as many people in the region as possible with our deliveries, which is why we are always looking at new areas to add. If we don?t currently service your particular area, just ask us if we may be adding it soon. And, our customers are always welcome to visit our warehouse and pick up their orders, which is a good choice for those in areas that we do not currently service.?

In addition to their wide selection of water bottles and coolers, the company is also a direct distributor of Keurig brewers and offers an extensive selection of K-cups for those brewers. Picinich states that they currently have more than 140 different types of K-cups from which customers can choose, including coffees and a selection of teas. Boxes of K-cups contain 24 to each box.

The company is open from Monday through Friday and on Saturday mornings for those who may be needing to schedule a delivery or a pick up of products. Picinich states that one reason why they are so popular is because, aside from their competitive pricing, customers are not bound to a contract. They can order one time or have regular deliveries scheduled, all depending on the specific needs of each customer.

Picinich states that the family owned business has been providing quality and affordable spring water for more than 25 years. During this time, they have expanded their service area to now include even more customers throughout the state of New Jersey. Those interested in learning more about Diamond Rock or in finding out more about their service areas can visit them on their official Facebook page. The company also regularly donates water to local sports and other events, as well as monetary donations to various charities in the area. Picinich states that they believe in small town values, always being active in their local community. He says however, that even though they are loyal to their hometown community, they believe in helping those outside the community and he says that they are always looking at new service areas where they believe their products will be well-received. Those interested in learning more about Diamond Rock or the areas that they service can visit them on their official website or contact the company directly by phone or email during their normal business hours.
