

EPS Landscaping & Tree Service Offers Palm Tree Services

March 12, 2021

Pembroke Pines, Florida - March 12, 2021 - PRESSADVANTAGE -

EPS Landscaping & Tree Service LLC is happy to announce that they are offering various services for palm tree trimming and palm tree removal. Palm tree trimming is vital for shaping the tree when the foliage has already become overgrown. Palm tree removal may also be needed when a tree is dying or dead or there is a need for more space in the yard, such as when adding a swimming pool, a garden, or a new building like a detached garage. It may also be that the tree has been felled by a storm and this has to be removed, especially if it poses danger to people and to the house or building.

Greg O'Connell, co-founder of EPS Landscaping, says, "Broward County, Florida, is an excellent environment for palm trees, but they need the same care as other trees. Sometimes, the dead fronds can be a fire hazard, but they can also look bad in your yard. And like other trees, you may decide to remove a palm tree. Palm tree removal is necessary when your tree is dead or dying overall. Your palm tree roots can grow more than you think, so getting rid of them with the rest of the tree is essential."

Palm tree trimming is an important service for shaping the tree when the foliage has overgrown. Such palm trees may have hanging dead fronds that may be fire hazards. Such fronds also don't look attractive and can spoil the attractiveness of the home. And it is often recommended that the best season for palm tree trimming is during the spring because the weather would be relatively calm. When there is not much wind, the tree experts would find it easier to visualize the shape of the palm tree. Also, it is advisable not to trim the palm tree more than necessary. It is important to leave as many healthy fronds as much as possible in order to protect the palm tree.

Palm tree removal is another essential service offered by EPS Landscaping & Tree Service. The palm tree roots may grow and expand more than expected. If such is the case, it would be necessary to remove that palm tree. Removing a palm tree may also be required when adding something to the yard to increase the home's value.

EPS Landscaping & Tree Service LLC is a provider of professional tree care services in Broward County, FL. They have tree specialists for removal, trimming, or planting. Homeowners and other property owners can contact EPS Landscaping and they will send an arborist to assess the tree and suggest the needed range of arborist services and the best steps to take. The tree specialists would be able to find out if there are any signs of dead limbs or disease and eliminate them. They have the equipment and tools for cutting any tree in Broward County and help make sure that the yard's appearance is satisfactory.

Removing a tree is not just for those that are diseased or damaged. Although perfectly healthy, some trees have to be removed because they are not really suitable for heavily populated places like cities. These are trees with roots tend to be too widespread such that they may reach the neighbor's property. Their roots may also reach underground structures and inflict damage. Therefore, such trees need to be removed from a property before the homeowner or property owner starts experiencing a number of problems.

EPS Landscaping & Tree Service may also provide tree relocation, especially for people who are transferring to another home. Relocating a tree is not a simple task and will also require the help of tree experts to avoid damaging the tree. They have the experience and the right tools for moving a tree safely to the new location.

Homeowners and other property owners who would like to know more about the palm tree services offered by EPS Landscaping & Tree Service LLC may want to visit their website, or contact them through the telephone or via email. They are open from 8:00 am to 6:00 pm, from Monday to Friday; and from 8:00 am to 3:00 pm on Saturdays.
