

Best Skip Tracer Is Helping Real Estate Entrepreneurs Gain Access To Accurate And Affordable Data

March 16, 2021

March 16, 2021 - PRESSADVANTAGE -

Best Skip Tracer, an online skip tracing service provider, is assisting real estate entrepreneurs with a variety of skip tracing requests. The company stands by the claim that its name makes and backs it up with a service that has glowing reviews from its customers.

Skip tracing is the act of finding (or ?tracing?) someone. Clients typically send the online service a list of names and addresses. The online service returns them a list with phone numbers and emails for the individuals and business entities on the client?s list. The software was born out of the need to get the maximum bang for the buck for the company?s own marketing dollars. This was not possible when the marketing campaign was based on inherently bad data. Best Skip Tracer was created to serve this need as existing solutions in the market were not up to the mark. Best Skip Tracer uses multiple data providers and cross-references more than 15 data sources to produce what it claims to be the most accurate information in the industry. The result is also much more affordable compared to other online services in its class.

The software is designed to be usable and helpful for both newbies and seasoned veterans who are looking for a service that is more accurate than others in the industry. The online service is helping real estate

entrepreneurs gain access to the most accurate and affordable data at the tip of their fingers. The company says on its website that its goal is to empower entrepreneurs to get better results and create brighter futures. The company prides itself on its reputation for working one-on-one with each client and giving them individualized attention. The company also values speed as it aims for quick turnaround times in fast, hassle-free transactions.

Elaborating on the name of the company, spokesperson John Paul Kilduff II says, "Our name is our claim and we stand behind that with 100% certainty. We realize the boldness of our name might create doubts in the minds of someone who thinks that the service we promise just might be too good to be true. I want to assure you that we settled on that name with full conviction only after thorough testing of our service in the real world. Compared to what our competitors offer, our service is miles ahead in data richness and accuracy. We are staking our future on the claim and we are confident that we will follow through once customers try us out. Our confidence is based on our extensive knowledge of the data industry, a network of data-rich resources, and years of expertise."

When speaking on the company's values, the spokesperson says, "We are guided by our core values, mission, and philosophy. We make tough decisions every day. The thing that keeps us going is our mission to provide entrepreneurs the opportunity to scale their businesses through better data at affordable pricing. We truly care about our end users. Our guiding principles are to be intentional, speak accurately, and think collaboratively. Our business philosophy is to never stop improving and to keep setting the bar in everything we set out to accomplish."

The pricing for the online service is offered in three tiers. The first one is a free membership that costs 20 cents per lead. It provides features such as advanced list scrubbing, 24-48 hour delivery, up to 7 phone numbers, up to 2 email addresses, and the inclusion of LLCs. The second tier is a premium membership that costs \$9 a month and offers the same features as the free membership for a lower rate of 12 cents per lead. The final tier is the VIP membership that costs \$97 per month and offers the same features as the previous two tiers at an even lower rate of 8 cents per lead.

The business can be contacted on its phone number (619) 324-8998 or its email success@bestskiptracer.com. There is a contact form on the website too for those who prefer to use that. There are also links to the company's social media on its website.
