

Lenard's Lawn Care Service Offers Lawn Fertilization and Weed Control in Chesapeake Virginia

March 22, 2021

March 22, 2021 - PRESSADVANTAGE -

Lenard's Lawn Care Service, which is based in Chesapeake, VA, is pleased to announce that they are offering lawn fertilization and weed control services in Chesapeake and neighboring areas. They believe that the first thing to do for a lawn with weeds is to check the soil to find out if it is healthy. Lawn fertilization may be required to make the soil healthy, and once it is healthy, this must be maintained. It is important to realize that the grass consumes nutrients and therefore, soil nutrients have to be added on a regular basis. If the soil nutrients are insufficient, the grass will be sparser and weeds will fill up those vacant spaces. Thus, a lawn that is deficient in soil nutrients will tend to have more weeds and less grass.

Mike Lenard, owner of Lenard's Lawn Care Service, says, "We maintain the greenery of your grass with top of the line fertilization. We also prevent and control weeds from overtaking your yard."

They don't recommend killing of weeds until the soil is ready for planting the grass seeds. Killing weeds before planting the grass seeds will only provide space for other weeds to sprout up. And if the soil has mostly weeds growing, killing the weeds may only lead to soil erosion, which will cost more to remedy in the long run.

After the soil has been assured to be healthy for growing grass, it is time to eliminate the weeds. The programs offered by Lenard's Lawn Care Service are designed to provide the homeowner or property owner with a healthy lawn. Having effective lawn fertilization and weed control programs are vital to having a thick green lawn. And timing is essential. If the application of weed control is too early or too late, it will not be as effective.

For healthy lawn maintenance, it is also important to water the lawn regularly and to mow the lawn. For homeowners and other property owners who don't have the time and the equipment to mow the lawn properly, Lenard's Lawn Care Service also offers lawn mowing services. This is actually part of their expert lawn care services, which include: mowing, edging, aeration, fertilization, weed control, and spring and fall clean up. They have various kinds of lawn care packages from which to choose from. They offer weekly and bi-weekly service calls with the weekly service calls including mowing.

They also offer lawn aeration services, including sod installation, lawn renovation, mulch services, and residential or commercial services. They also provide seeding services, including overseeding, starter fertilizer, and residential or commercial services. And they also provide commercial snow plowing services in the Hampton Roads area.

There are a number of factors that make Lenard's Lawn Care Service stand out among the crowd. These include quality services, certified experts, and affordable pricing. They ensure that the client's lawn is kept looking great by using top quality products and quality lawn care services. In addition, they have a team of certified lawn care experts who are truly knowledgeable about the equipment and products that they use. Furthermore, they always follow the guidelines set by the manufacturers, including the warnings and precautions. And they assure that their prices are fair and competitive.

Previous clients have provided highly positive feedback about the service they received. For instance, Jeffrey P. gave them five stars and said, "Best lawn care by far, I have ever had. Prompt every week and if any delays, I get emails prior to disruption. I can even see the space between the bottom of my fence and ground. I could never do that. LOL."

Margaret S. also gave them five stars and said, "Veteran-owned and fantastic customer service. If you want "just okay" lawn care you'll have to look elsewhere. However, if you want great customer service and lawn care, then call Lenard's Lawn Care!"
