ServiceOne Leading With The Daikin FIT System in Omaha

March 29, 2021

March 29, 2021 -
Omaha, NE-based ServiceOne is pleased to acknowledge that they remain comfortably in the lead when providing customers with the latest and greatest HVAC technology. The company would like to highlight that they offer Inverter systems, the Daikin FIT model in particular. Variable-speed Inverter systems help prevent the common and uncomfortable temperature swings of traditional heating and cooling systems. Jeff Churchill of ServiceOne says, ?Being the owner of an HVAC company, I could put any system I wanted into my own home, and I chose the Daikin FIT system because I saw how much our customers love it.?

Instead of replacing a box with another box, the company makes an effort to show homeowners that they do not have to settle when it comes to home comfort. Homeowners can minimize their system?s footprint while reducing hot and cold spots, improving air quality and efficiency. ServiceOne believes the Daikin FIT system bridges the gap between traditional heating and cooling and ductless technology.

Living in the Midwest, the community has to deal with harsh summers and winters, so the compact FIT outdoor unit paired with a gas furnace gives homeowners the best of both worlds. Jeff Churchill adds that ?It?s the first time I have seen customers brag about their system to their family and friends on social media.?

ServiceOne has an exciting offer on the FIT system running through the 30th of April, 2021: Homeowners will receive $1350 in cash, plus make no payments for 12-months when they choose to upgrade to the Daikin FIT model. Learn more about the system through the company?s Daikin FIT System videos.

The company also offers an online tool to help homeowners identify how much they will save when upgrading to an Inverter system like the FIT. This tool is called the Daikin Efficiency Advisor. All a homeowner has to do is submit some basic information about their home and lifestyle, and the advisor will assess the possible savings they stand to gain. In North America, the typical home HVAC unit is a 10-13 SEER unit. However,

options such as the Daikin FIT are available, and they offer more efficiency, comfort, and savings.

The Daikin FIT system is quiet, compact, and allows homeowners to save up to 30% on energy costs. Churchill further explains, ?Early last Fall, I replaced the heating and air system in my own home with the Daikin FIT system, and I can?t believe how comfortable the whole house has become. Because of the inverter technology (think cruise control for a car), the air is consistently moved around our home, keeping problem areas of the home, the basement, and the bedroom above the garage, at more even temperatures.?

For 30 years, ServiceOne has been the ?One Simple Solution? for residential and commercial installation and repair services in the Omaha / Council Bluffs metro area and Dubuque, Iowa. The company offers a wide range of services, including heating, cooling & geothermal, plumbing & drains, appliance repair, electrical service, generators, and indoor air quality.

ServiceOne also offers a wide variety of service plans and a local home warranty product to deliver protection and peace of mind. ?One Simple Solution? defines what makes ServiceOne unique: there is one number to call for all major services. This simple approach sets them apart from other providers who individually specialize in heating and cooling, electrical, plumbing, and so on. ServiceOne is effectively five or six companies in one.

The company?s dedication to its clientele is evident through its many positive testimonials. In a testimonial published on the company website, Shauna S. states, ?The difference between our new system and our old system is night and day ? not only inside but out! We used to turn our AC off when we sat around the fire pit as we couldn?t hear one another talk! Thanks, ServiceOne! We love our new AC and Furnace!!?
