

CDMG Leads in Designing Prefabricated Metal Sports Facilities in Pennsylvania

March 23, 2021

Canonsburg, Pennsylvania - March 23, 2021 -
Pennsylvania-based CDMG is a leader in designing pre-engineered metal buildings. The top PA steel building kit developer has earned a reputation for designing prefab metal sports facilities, indoor athletic facilities, and other recreational metal buildings. Steel is the optimal choice for an indoor athletic facility.

Click on the link to learn more about pre-engineered metal sports facilities; https://www.cdmg.com/metal-building-kits/sports-complex

?With its strength to weight ratio, steel can allow for up to 300ft of clear space for a recreational facility,? the metal building company states. A steel building sports complex allows more room for activities, unlike wood and concrete facilities that make it tough to create an unencumbered space.

A metal building is highly durable and can withstand harsher elements, states the Pennsylvania metal building kit supplier. Wood or concrete structures are susceptible to rot and infestations and cannot stand

natural disasters. CDMG claims that prefab metal sports complexes require low maintenance and are ideal for indoor basketball facilities or tennis courts.

According to the top Pennsylvania metal building kit supplier, the ongoing cost of construction of a recreational steel building is much less compared to traditional construction units. The shorter construction period saves money during the initial phase and will cost less if an expansion is needed in the future.

CDMG explains how a metal building addition or expansion is relatively easy with their pre-engineered metal building kits.

Prefabricated metal buildings are environmentally friendly. CDMG leverages Nucor steel, which is 100% recyclable. ?And if there is ever any reason that your metal building needs to be torn down, the impact on the environment will be minimal,? states Thomas Corry, Metal Building Division Manager.

The top metal building supplier in Pennsylvania designs buildings that are both environmentally friendly and community-friendly. CDMG is a certified builder with Nucor building systems, which manufactures top-grade, durable steel that meets all ?certification requirements for metal buildings for raw materials, design specifications, software, building code compliance, and quality control procedures,? Tom says.

CDMG is dedicated to Nucor?s FOCUS approach that explains its motto - Fits - On-time Delivery - Competitive Pricing - Unbeatable Service - Solutions that Work. The PA steel building kit developer designs metal sports facilities for gymnasiums, arenas, yoga studios, martial arts centers, natatoriums, fitness centers, and indoor fields.

CDMG emphasizes that steel buildings are no longer bland looking, adding that they can be designed with an awe-inspiring exterior finish. A top steel building erector in Pennsylvania guarantees to transform the client?s dream into reality. CDMG is one of the leaders in designing pre-engineered metal buildings.

Anybody planning to make an indoor sports facility with pre-fabricated steel should leverage the expertise of CDMG. The top metal building kit supplier in Pennsylvania is flexible and provides supplies, design, and full construction services. Rely on the experience of CDMG metal buildings to design a prefab metal sports complex. Get a personalized quote for a metal sports complex on the CDMG website and put your ideas to action.

                    "@type": "Answer",
                        "text": "Another reason that reason prefab rec centers are ideal is the durability of a metal building.  Wood is susceptible to rot, infestations like termites that can weaken the structure, and they don't stand up as well in adverse weather conditions. Concrete is less susceptible to rot and infestations, but the maintenance required when it buckles or cracks is time-consuming and expensive.  A steel building sports complex won't rot, warp, buckle, or be susceptible to termites and other pests' infestation. Additionally, pre-engineered metal buildings can stand strong against mother nature.  In addition to being more durable,
```

prefab metal sports complexes are much more low maintenance. Less rot, less warping, less buckling or cracking means more time spent running your facility and creating events that your community or customers can enjoy. ",

"text": "The less time and money you will save with a durable, low-maintenance metal sports facility, the more money you save, but it's not the only way pre-engineered metal building kits can help you save money. You will also keep your recreational steel building cost down during your construction project. Prefabricated metal building kits arrive on-site and, with the help of a steel erection company, can be erected much quicker than traditional building materials. You won't have to wait for concrete to cure or for specific pieces of lumber to be delivered. This shorter construction period allows you to save money during the initial construction phase and when you need to expand your prefabricated metal sports facility. ",

"text": "In addition to being durable and allowing you to save money, prefabricated metal buildings are much more environmentally friendly than other building materials. Steel is 100% recyclable. At CDMG, we partner with Nucor Building Systems, which means our pre-engineered metal building kits are made from 90% recycled steel providing you with an environmentally friendly sports facility. And if there is ever any reason that your metal building needs to be torn down, the impact on the environment will be minimal. Instead of building materials sitting in a landfill, they can be recycled and used in another prefabricated steel building. But your building won't just be environmentally friendly; it'll be

community-friendly as well, thanks to our customizable options.",

"name": "How Customizable Are Steel Indoor Sports Facilities? ANSWER",
"text": "Building a sports facility with prefab metal buildings may seem like it would be limited with not only the design but aesthetics as well. However, when you select CDMG to help with your design and erection of your prefab metal indoor sports complex, it won't just be a metal building to play basketball in. It'll be much more than that. CDMG Metal Buildings Can Help Keep Recreational Steel Building Costs Down With CDMG, you can design a sports facility that can house any of the following: Yoga studios Martial arts centers Dance studios Bowling alleys Natatoriums Arenas Gymnasium Ice skating or a roller rink Indoor sports courts Indoor fields for soccer, lacrosse, or field hockey Weightlifting Gym Fitness Centers Batting Cages Track The only limitation in what a prefab metal sports complex can be is within your imagination. And with the clear-span capabilities, if you need to change the layout down the road, you'll be able to add walls, doors, or mezzanines if you need. Our metal building kits can come in various sizes and layouts that can accommodate what you need your sports facility to be. And the days of your rec center looking like a metal barn or something that belongs in a field are long gone. You'll be able to choose an exterior finish that will impress and give your prefabricated metal recreational building the modern look that you want. Besides all these benefits that you'll get when you choose a pre-engineered metal building, you need a partner that can help you make your sports complex a reality.",
