

EPS Landscaping & Tree Service Offers Tree Trimming in Pembroke Pines

March 25, 2021

Pembroke Pines, Florida - March 25, 2021 -
EPS Landscaping & Tree Service LLC is pleased to announce that they are offering tree trimming service in Pembroke Pines, Florida. Tree trimming is essential to help keep the trees beautiful and healthy. Trimming can make the tree appear more beautiful and can emphasize its natural shape. This is also vital when trees have long and thick branches, which prevent sunshine and rain from getting to the plants underneath the tree. More about the tree trimming services offered can be gleaned from https://epslandscaping.net/tree-service-pembroke-pines/.

Meanwhile, they also offer palm tree trimming, which is an important service for shaping the tree when the palms have overgrown foliage. There may be hanging dead fronds, which are fire hazards. These dead and dry fronds can also spoil the attractiveness of the home and its curb appeal. The best season for trimming palm trees is during the spring due to the relatively peaceful weather. With only gentle winds, the tree experts can easily visualize the proper shape of the palm tree and do the necessary trimming. And it is important to let tree professionals do the trimming. Too much trimming can jeopardize palm tree health. It is vital to leave as many fronds as much as possible to protect the health of the tree.

EPS Landscaping & Tree Service LLC offers professional tree care services in Pembroke Pines and surrounding areas. Their tree specialists can provide tree removal, trimming, or planting. They also offer landscaping services, lawn care services, and irrigation services. Tree services, aside from tree trimming, consist of tree planting, tree installation, tree relocation, and tree removal services.

Tree planting or tree installation is important for a home or property because it will not only add color and beauty to the lawn and the property as a whole but it will also absorb carbon dioxide from the air and then release oxygen. As such, having a tree in the yard can enhance the physical and mental health of family members. While having a tree planted can cost money, it will actually help the homeowner save money in the long run because a tree can shield the home from the sun?s rays, which means that it will cost less to ensure that the interior of the home is comfortably cool.

A homeowner may want to hire EPS for a tree relocation service if a tree has grown too large for its original spot or when the homeowner wants to bring a particular tree to a new home. Once again, tree professionals would be needed for this task because they have the proper experience and the tools to move the tree safely. It is basically possible to relocate a tree of any size, but some precautions must be followed to prevent damage to the roots.

And for yards that, for some reason, have tree stumps, EPS can provide stump grinding and removal services. Leftover stumps spoil the aesthetics of the yard. Also, while the roots stop growing once the tree has been cut down, there could be enough nutrients in the roots to produce sprouts that can grow into a new tree. The roots may also have gotten too close to the house or other trees, and the stump can be a hazard for children playing in the yard. EPS can provide stump grinding to finally get rid of the stump and make the lawn smooth and flawless.

EPS can also offer landscaping services to add aesthetic appeal to the yard and the property. For Pembroke Pines homes, tropical landscaping can be offered. This can be a bit more complicated compared to other landscaping types because it makes use of several kinds of plants that need different methods of care.

Those who are interested in learning more about the tree trimming services offered by EPS Landscaping & Tree Service LLC can check out their website, or contact them on the phone or through email. They are open from 8:00 am to 6:00 pm, from Monday to Friday; and from 8:00 am to 3:00 pm on Saturdays.
