

EPS Landscaping & Tree Service Provides Tree Service for Pembroke Falls Community

April 01, 2021

Pembroke Pines, Florida - April 01, 2021 -
EPS Landscaping & Tree Service LLC is happy to announce that they can offer their tree services to the Pembroke Falls community in Pembroke Pines, Florida. Pembroke Falls is a gated and master-planned community designed for people who prefer an active lifestyle. This particular community provides easy access to shopping centers and major highways. It has several outdoor amenities, such as lush landscaping, neighborhood tot lots, many stocked lakes, and several miles of sidewalks for jogging, walking or running. It has four gated entrances that are guarded 24-hours a day and they have roving guard patrols to ensure security. More about the tree services provided for this community can be gleaned from https://epslandscaping.net/tree-service-pembroke-falls/.

One of their typical tree services is tree trimming, which is for all kinds of tress, including palm trees. Palm tree trimming is important because the dead fronds can actually be a fire hazard and they reduce the aesthetic value of the yard. However, the best season for palm tree trimming in Florida is during the spring, when the weather is relatively calm compared to the other seasons. It is vital to have the trimming handled by tree experts to avoid over-trimming, which could be harmful to the tree. This is also true for the other kinds of trees.

Palm tree removal may also be necessary, especially during those times when trees have been damaged or have been felled by a storm. When a tree is dead or dying, for whatever reason, it is a good idea to have it removed to avoid having a rotting tree in the yard, which could harbor diseases and negatively affect the beauty of the yard. Removing a tree may also be needed when more space is required for constructing an extension of the house, such as a garage or a patio, or a swimming pool.

EPS Landscaping & Tree Service LLC provides professional tree care services in Pembroke Pines and its neighboring areas. Their tree experts or arborists can offer tree planting, tree removal, tree planting, or tree installation. Tree planting may be required by new homeowners. Trees in the yard are desirable not just because they can help in making the yard more attractive but also because they can reduce the carbon dioxide in the air, while increasing oxygen. More oxygen means better physical health and even better mental health for people as it may help in decreasing anxiety and stress. The tree professionals can help in the choice of the type of tree to plant and advise on how to properly care for it.

They can also help in installing a tree in the yard, which requires some planning. The tree professionals from EPS can help the homeowner in finding the best position for the tree to be installed. They can also ensure that the soil is appropriate for the tree, and if not, they can suggest what nutrients to add to the soil. They are also knowledgeable on how to support the tree initially to protect it from getting damaged.

EPS Landscaping & Tree Service LLC can also help with tree relocation. Whether this is because the tree has grown too big for its original spot or the client wants to move the tree to a new address, they can offer the necessary assistance to make sure that the tree is not harmed during the process. They have the tools and the experience to move the tree safely, without damaging the roots or causing harm to the tree in any way.

They can also offer stump grinding and removal services. This is needed because stumps can be an eyesore and they can be dangerous for children who play in the yard. A rotting stump may also be used as a nest by pests or it can harbor diseases.

Homeowners and other property owners who would like to know more about the tree services in Pembroke Pines offered by EPS Landscaping & Tree Service LLC can visit their website, or contact them through the telephone or via email. They are open from 8:00 am to 6:00 pm, from Monday to Friday; and from 8:00 am to 3:00 pm on Saturdays.
