

Bob Jenkins Pest & Lawn Services Shows How to Get Rid of June Bugs

April 08, 2021

April 08, 2021 - PRESSADVANTAGE -

Bob Jenkins Pest & Lawn Services, a company based in San Antonio, TX, wants people to know how to get rid of June bugs. This particular bug is a kind of beetle that usually appears anywhere from May to early July but it is most prevalent during the month of June, which is why it has earned the name, "June bug." Bob Jenkins Pest & Lawn Services, which also offers lawn services (<https://prescriptionlawns.com/>), can get rid of these bugs.

The June bug is not particularly dangerous to humans and animals but it can cause problems or at least be a nuisance for commercial establishments. It makes a buzzing sound while flying around bright lights to which it is attracted. To some people, the June bug can be annoying or even frightening, which is why it can be considered as a pest by commercial establishments. This particular type of beetle can also do harm to trees and shrubs since it eats their leaves during the night. Since they are nocturnal, which means they disappear during the daytime, they can be difficult to control. Thus, it is a good idea to have the removal of the June bug be done by a professional pest control company like Bob Jenkins Pest & Lawn Services.

Mike Davison, General Manager at Bob Jenkins Pest & Lawn Services, says, "People trust Bob Jenkins Pest & Lawn Services to do the job right. We understand how uncomfortable, embarrassing, and potentially harmful a pest problem can be. Our exterminators are dedicated to resolving your pest control problems. We work within strict standards of top-quality workmanship, reliability, and exceptional customer service and we take pride in being stewards of the environment. When you call us about a problem, you can be assured that it will be taken care of safely, efficiently, and professionally."

Bob Jenkins Pest & Lawn Services uses advanced tools and methods for getting rid of pests. Such techniques and equipment have been ensured to be safe and not to affect children and pets. This means that they always put the safety of the people first. Their exterminators are specialists in eliminating bugs and pests, like carpenter ants, termites, rodents, spiders, bed bugs, silverfish, earwigs, and scorpions. They will

first inspect the building and then offer some suggestions on how to prevent pests from getting in.

Bob Jenkins Pest & Lawn Services has more than 30 years of experience in getting rid of termites in San Antonio. They are experts when it comes to the control of termites and other wood destroying pests. They can also provide Wood Destroying Insect Reports for the home or building.

They can also customize their pest control service options to meet the client's requirements when it comes to schedule of clients and the warranty they can offer for their services in between scheduled appointments. With such a warranty, they can take care of the problem the client may have and if it returns, they will return and do what is necessary without any additional charge.

And as hinted by the name of the company, Bob Jenkins Pest & Lawn Services also provides lawn care services for both residential and commercial properties. For those whose yards have been affected by the Texas drought or have simply been overcome by weeds, the lawn care experts from Bob Jenkins can be consulted and they will create a prescription health care program for the lawn, beginning with the soil requirements. This program will also include fertilization, weed control, and insect/ disease control. They can also provide a customized prescription program for tree and shrub care, weed control, and the control of turf-related pests.

Those who would like to know more about the pest control services provided by Bob Jenkins Pest & Lawn Services can visit their website at <https://jenkinspest.com>, or contact them on the phone or through email. They are open from Monday to Friday, from 7:30 am to 5:00 pm, and on Saturdays, from 8:00 am to 12:00 noon.
