

Raleigh SEO Company WeRankVids.com Takes a Different Approach To Online Marketing

September 21, 2015

September 21, 2015 - PRESSADVANTAGE -

WeRankVids.com, based in Clayton, NC, has announced that they now offer their video marketing services to companies in Raleigh, NC. To celebrate this new market opening, they posted a thorough explanation of their Raleigh SEO Services to help people understand how their marketing is different.

"Through our years of experience, we have developed a platform that truly brings results quickly," says Josh Smith from WeRankVids. "We feel that we are the Best Raleigh SEO Company right now because of our unique approach through Video SEO."

Recent research has shown that, due to the audio-visual nature of videos, one minute of video equates to 1.8 million written words of text content. Internet users are consuming more video content than ever before. It is expected that by 2017, 74% of all internet traffic will be the consumption of video media.

For WeRankVids.com, what matters is that many people look for information online, but they will struggle to find it. They are looking for videos to help them solve problems. Because of this, the market is still wide open for businesses of all types to take advantage. This is why they encourage all business owners and

stakeholders to visit the website at werankvids.com. Details about the various services the company offers and how these are beneficial are listed there.

"We offer a number of options that are beneficial to all types of businesses," adds Ron Jenkins. "Clients can choose any or all of these services, depending on their current situation and their current goals. Our packages involve everything from custom video production to full-on Video Marketing packages where we create the video, optimize it for lead generation, and get traffic to it. When someone chooses the full package, it truly creates a situation where they are able to dominate their online market in a very short time."

For WeRankVids.com, the reality is that many business owners don't truly realize the power of proper video marketing yet. Now is the time to focus on video content, since so few have taken that step yet. This means that driving traffic to videos through search engine rankings is much easier than it will be once the market is flooded. Now is the time to take action.
