

Advanced Skin Fitness Medical Spa Publishes New Article On Benefits Of Chemical Peel

April 08, 2021

April 08, 2021 - PRESSADVANTAGE -

Advanced Skin Fitness Medical Spa & CoolSculpting Center, based in Dallas, TX, has revealed that they have explained the various benefits of getting a chemical peel in a recently published article on their site. The article discusses the top four benefits of a chemical peel. These are the reduction of acne, decrease in fine lines and wrinkles, lightening of scars, and healing of sun damage to the skin. A chemical peel, which results into exfoliation, encourages new and healthy skin to emerge. This can cause an improvement in the overall tone and texture of the skin, thus providing a younger-looking, brighter, and glowing skin.

James, a spokesperson for Advanced Skin Fitness, says, "While a chemical peel may sound intimidating if you're not familiar with what it involves, it is in fact an effective remedy for a myriad of skin problems, including wrinkles, acne, and hyperpigmentation. A chemical peel might be the solution if you're looking for a way to get even pigment, and smoother, younger-looking skin. To get started, schedule a free consultation with us here at Advanced Skin Fitness. If you're not yet sure, we invite you to an online chat with one of our aesthetic experts to get a free treatment plan with various options. You can ask as many questions as you want and there is absolutely zero obligation on your part."

The chemical peel is one of the skin and face treatments offered by Advanced Skin Fitness. As mentioned in the new blog post, a chemical peel can get rid of dead skin cells through the encouragement of exfoliation, hydrate the skin, stimulate the production of collagen for the growth of new skin, and counteract the damage caused by the sun. The chemical peel process is painless and fast and once it is done, the skin will start to heal and eventually, new, healthy and firm skin will emerge.

Advanced Skin Fitness Medical Spa & CoolSculpting Center utilizes Skinceuticals Peels for their chemical peel sessions. Their esthetics technicians are well-experienced and skilled regarding the skin rejuvenating processes. They will thoroughly examine the patient to find out the best chemical treatment for the patient's skin. Chemical peels have been observed to be highly effective in substantially lightening freckles, decreasing acne, and reducing discolorations that were caused by melasma.

Advanced Skin Fitness provides different kinds of treatments for the skin and face. In addition to the chemical peel, these include Clear + Brilliant fractional laser treatment, microdermabrasion, hydro facial skin resurfacing, laser resurfacing, Dermafrac, microneedling with RF, vShape, photofacial, Ultherapy, spider vein treatments, and vampire facials.

Clear + Brilliant is a fractional laser treatment for rejuvenating the skin by eliminating fine lines and wrinkles, combatting dullness of the skin, and getting rid of hyperpigmentation, uneven skin tone, and large pores. It uses a non-ablative laser beam that gently penetrates the skin at a very limited depth for the purpose of creating very small treatment zones in a small part of the skin. This results in the destruction of damaged skin cells and the replacement of the damaged skin with younger and healthy-looking skin.

Microdermabrasion is a non-invasive type of treatment that can improve the texture of the skin by getting rid of the dead outer layer of skin and totally clearing out clogged pores. It is an exfoliation procedure that can reduce wrinkles, fine lines, clogged and enlarged pores, leathery skin, imbalanced pigmentation, acne scarring, brown spots, and crow's feet. They use the DermaSweep MD Microdermabrasion machine, which allows patients to notice dramatic results even after the first treatment.

Likewise, hydrofacial skin resurfacing is a non-invasive, safe, and non-surgical treatment that can provide the benefits of a chemical peel in a series of steps: cleanse and peel; extract and hydrate; and fuse and protect. It will also painlessly get rid of any excess oil that has accumulated in the pores and help hydrate the skin with antioxidants.
