

Comprehensive Tree Care Service Available In Pembroke Pines Florida

April 22, 2021

Pembroke Pines, Florida - April 22, 2021 - PRESSADVANTAGE -

Pembroke Pines, FL based EPS Landscaping & Tree Service LLC is pleased to bring their community's attention to the company's expansive suite of tree care services. With the spring season well underway and summer fast approaching, the time is ripe for homeowners to have their trees both inspected and looked after by a professional. Today, the team at EPS Landscaping & Tree Service LLC is standing by to deliver every possible service the trees in their community may need.

While homeowners can rely on the company for tree removal and tree care, these services represent only a few examples of their capabilities. For instance, the company is able to relocate an existing tree to a new location. This may seem like an unlikely option, but homeowners are known for becoming attached to their trees, and they may wish to relocate their favorite tree to their new home when they move. In other circumstances, they may simply believe it to be a waste to cut down (and kill) a tree simply because it has grown too large for its environment, at which point relocating the tree to a more suitable area would be necessary. Whatever the reason, EPS Landscaping & Tree Service is ready and willing to help. Notably, the company advises customers that the best time to move a tree depends on the type of tree, so a relocation may have to wait if the tree's survival is one of their priorities.

Fortunately for most, there are less demanding methods of taking care of a tree. Pruning and trimming services, for instance, can be used to both promote healthy trees and facilitate growth as intended. Unnecessary branches and leaves can be disposed of in this way, and this also serves to limit the spread of harmful plant diseases. As with relocation, there are certain stages or periods in which pruning or trimming is the right decision. A tree care specialist from EPS Landscaping & Tree Service can help any homeowner make sure they make the right call, and this will also help ensure that the tree in question has its branches cut appropriately.

EPS Landscaping & Tree Service has taken several measures to understand what their customers need, which allows them to maintain a consistently high degree of customer service throughout the year. Notably, they are always eager to share the benefit of their experience. Read this post about the Pembroke Falls community for more. Their commitment to their community is also evident in the reviews the company receives online.

“Had a great experience with EPS,” says a Google review from C. Bartels. “We called for an estimate and not only did they answer the phone immediately, they came out within two hours for a quote. By week’s end, my garden beds were refreshed and looking awesome again! Thank you, Greg and Jessica, for your prompt service and reasonable pricing.”

Pembroke Falls is a highly sought-after residential community in Pembroke Pines, which is due in part to the area’s natural beauty. Since the team is aware of this fact, they also recognize that trees sometimes have to be removed in their entirety in order to protect local residents and property – or even other trees. One situation where removal may be necessary is if the tree dies or becomes infected with a disease that has spread to too many limbs. Some trees may also have to be removed if they reach an excessive size, have roots that stray too close to nearby homes and so on. Whatever the reason, the company advises their community to rely exclusively on a professional’s assistance to remove such trees. Tree felling can be extremely dangerous, particularly given the weight of the tree involved, and it takes a careful, experienced team to ensure that a tree is removed without posing a threat to nearby people or property. It is for this reason that the company also provides emergency tree removal, allowing homeowners to address a dangerous situation quickly and efficiently when needed.

EPS Landscaping & Tree Service offers a variety of tree services for the Pembroke Falls community, more information on which can be found on the company’s official website and other online resources.

Homeowners are also welcome to contact Greg O'Connell of EPS Landscaping & Tree Service LLC for further details.
