

Local Dentist Brings Cosmetic Services To Canberra

April 27, 2021

April 27, 2021 - PRESSADVANTAGE -

Woden ACT, Australia based Acacia Dental Group is pleased to announce that they are offering cosmetic dental services to residents of Canberra and the surrounding areas.

As noted on the clinic's website, cosmetic dentistry refers to dental services that improve the appearance of a patient's teeth and gums. In many cases, cosmetic dentistry involves enhancing or even replacing damaged and missing teeth. Some of the most common treatments under cosmetic dentistry are teeth whitening, veneers and dental crowns.

One of the first things that people associate with a perfect smile is a set of pearly white teeth. Some may believe that it is difficult to achieve a perfect smile, but the truth is that pearly white teeth are indeed achievable with the help of teeth whitening. Teeth whitening is a cosmetic dentistry procedure designed to lighten teeth and correct staining without completely changing the color of the teeth or making them unnaturally bright. It is one of the fastest ways to make a person's smile more beautiful, with a session taking up only about an hour or so of their time.

Teeth whitening is also one of the most accessible forms of cosmetic dentistry, thanks to its compatibility with any set of teeth and cost-effectiveness. At Acacia Dental Group, the teeth whitening services they offer consist of proper bleaching analysis as well as safe and comfortable in-chair whitening sessions. They also

give their patients a personal Zoom whitening kit that can be used to keep teeth shining for longer.

Many people have stained teeth, chipped teeth, crooked teeth or teeth gaps. In such cases, they may wish to cover up their damaged or discolored teeth. Fortunately, cosmetic dentistry has a solution that does exactly that, through veneers. Veneers are thin shells of porcelain that are designed to fit over the front of the teeth. They are then bonded to the surface of the teeth, covering up any existing imperfections. Veneers provide a natural look with a comfortable fit while remaining discreet and lasting for long periods of time. When patients get veneers at Acacia Dental Group, they can be sure that they will get the attention they deserve. Each set of veneers provided at Acacia Dental Group is carefully fitted to match perfectly and naturally with each patient's teeth.

Acacia also provides crowns that are made out of ceramic or porcelain material to replace a tooth or bridge gaps between teeth. They also offer many more cosmetic dentistry services and procedures for other purposes. Complete details about their dental services can be found on their website.

Many cosmetic dentistry services can take a few weeks to be ready. Patients normally have to set appointments to shape their teeth and take impressions well in advance. These impressions are then sent to labs where the restorations will be made while the patients use temporary solutions until their final teeth replacements are ready. However, Acacia Dental Group makes use of CEREC, a system that creates crowns, veneers, dental implants and other restorations with the help of computer-aided design. CEREC allows Acacia Dental Group to provide faster, more accurate and longer lasting restorations.

Acacia Dental Group has earned high praise for their cosmetic treatments.

For instance, one 5-Star Google review says, "Today, Dr. Mallik performed some wisdom teeth extractions for me. I am terrible with these things and was beyond terrified about having it done, nearly backing out several times. I am so glad I didn't. Dr. Mallik was amazing! The whole thing was completely painless, including the needle to numb my gums. His manner was so caring, and he checked on me every few mins to make sure I was ok. His assistants are equally as lovely, putting me at ease, reassuring me and holding my hand during the whole thing."

The review concludes, "It is a wonderful caring family practice, and I cannot recommend it highly enough. If you are putting off needed dental work because you are scared of the pain, please see Dr. Mallik - it will be pain free and you will be so glad you did. If I could give even more stars, I would. Very happy family of five customers."
