

Southampton Invisalign Invisible Teeth Straightening Braces Dentist Offers Virtual Consultations

April 27, 2021

April 27, 2021 - PRESSADVANTAGE -

Dr Manish Chitnis, principal cosmetic dentist at Dental Concepts in Southampton, is offering virtual consultations to prospect patients who are interested in getting Invisalign teeth straightening treatment.

?With the online and mobile technologies available to everyone today through smart phones, it is possible to exchange some of the information with patients without them having to visit a dental surgery and sit on a dental chair.? Explained Dr Manish Chitnis.

Any resident of Southampton seeking to have their teeth straightened with Invisalign can actually start their journey without leaving home. They can book a virtual consultation with Dr Manish Chitnis. All they need is a smart phone to participate in the virtual dental consultation.

Dr Manish first discusses the smile concerns of the patient in a phone call at a mutually convenient time. If the need arises, it is possible to continue the conversation in a video call in which the patient can show their

teeth to Dr Manish or the patient can submit images of their smile via their smart phone.

Such a virtual consultation can lead to a good assessment on whether the patient qualifies for an Invisalign treatment. If the answer is an affirmative, then the first visit to the dental practice is all about confirming the early assessment and a treatment plan.

Prospect patients interested in a virtual consultation with Dr Manish can book an appointment with him by visiting the following page:

Dental Concepts is, at the time of writing this article, offering an amazing discount to patients wanting their Invisalign treatment. Detailed information about the Invisalign Southampton special offer by Dental Concepts Southampton can be viewed by visiting the following link:
<https://www.dental-concepts.com/invisalign-invisible-braces-southampton/>.

Invisalign has become a very popular teeth straightening treatment both with adults as well as teens. The main reason for its popularity being that Invisalign uses transparent teeth-straightening aligners that cover the teeth but are near-invisible to others. Therefore, the treatment is not conspicuous like teeth-straightening with traditional metal braces. Hence, the treatment does not cause any embarrassment to patients who are either self-conscious or have sensitive everyday situations professionally or in social settings.

Worldwide, over 9 million people have received Invisalign treatment. Now, residents of Southampton can enjoy the benefits of this treatment as well with the additional advantage of receiving some hefty discounts that Dental Concepts Southampton is offering.
