

Bakersfield Exterminators Offering Termite Control

April 28, 2021

Bakersfield, California - April 28, 2021 - PRESSADVANTAGE -

Termites are one of the worst pest problems to have and are responsible for causing millions of dollars worth of damage to homes and properties each and every year. When termites are discovered or suspected the professionals at Simplicity Pest Control can help.

"The best way to ensure you never have a serious termite problem is through regular inspections. We recommend at least twice a year because the sooner they're caught, the less cost for repairs and more property you can save," the manager stated.

Subterranean termites live in the ground (dirt) and can easily eat their way to a nearby property or structure. Homes and buildings with plants or shrubs up against the exterior could be at a higher risk for developing a termite problem.

Obviously, termites love wood as their food source. This is why structures and certain features of a property are at risk for this particular pest; such as decks, patios, gazebos, railings, etc. "We always like to point out that termites do not like cedarwood or juniper so it's always suggested when feasible," the manager added. "Some people like having that added safety bonus to justify the expense. If it means termites won't be an issue, they feel it's worth doing."

The most common signs of termites are flimsy wood, flying termites, mud tunnels or tunnels, and termite droppings. Noticing any of these things could be an indication of a serious issue that needs to be addressed right away.

Simplicity Pest Control provides an array of options for treating these particular harmful pests. They encourage Bakersfield residents to contact them should they suspect or discover termites. This individual pest is not DIY-friendly. Termites require professional and expert treatment solutions.

"Our team will eliminate your termite issue and also do all that we can to ensure the problem doesn't occur again in the future. Even if you have never had an issue with this pest, or noticed any visible signs of them,

we advise getting an inspection regularly to stay on top of them,? the manager said.

To schedule a termite inspection with Simplicity Pest Control or to learn more about their services they can be contacted online here or by phone. They are happy to answer questions and can oftentimes provide an estimate by phone. The company also answers calls 24 hours a day for emergency services.
