

Glendora Car Accident Lawyer Offers Expertise To Local Community

May 11, 2021

May 11, 2021 -

Napolin Car Accident Lawyer Glendora, a firm based in California, is pleased to announce that they are offering their services and expertise for car accident cases in Glendora and neighboring areas. Members of the community who have been injured in an accident can rely on the services of a lawyer with experience in these cases instead of simply accepting the insurance adjuster's advice. Alexander D. Napolin, who leads the firm, is a top car accident and personal injury lawyer with extensive experience in handling claims and has his clients' best interest at heart.

Napolin points out that it is crucial for car accident victims to realize that the level of compensation that they are entitled to is often far more than just the cost of the repairs to the car. Compensation can include the medical bills that resulted from injury sustained from the collision, for instance. Furthermore, it may also include the cost of physical rehabilitation and even for wages lost as a result of not being able to go to work due to the injury (or having to go to doctor's appointments). The Napolin Accident Injury Lawyer Glendora firm ensures that their clients will receive everything they are entitled to.

The firm offers free consultation for car accident victims in order for the latter to find out if they really have a

case. Those who are not able to go to the law office because of their injuries or due to the pandemic have no need for concern because the consultation can also be done virtually. By using the appropriate technology, clients will not need to go to the office and sign paperwork or meet with the lawyer in person to have their concerns heard.

Alexander D. Napolin explains, "In a car accident situation, one of the most important steps to take always involves figuring out which of the two or more parties was at fault. Unfortunately, this is often a lot more difficult than just determining "who hit who." This level of complication is one of the many reasons why a personal injury attorney is so valuable in a car accident case. They can use police reports, photographs, witness testimony and other materials to determine exactly what happened, find out exactly which laws were broken and how and more, all of which will be used to determine both the appropriate course of action to take and the level of damages to seek in court."

Many former clients have conveyed their satisfaction about the service that they received through positive reviews shared on a number of online platforms. James K. gives the firm 5 Stars on Avvo and says, "I chose to call Napolin after my automobile accident, and I'm glad that I did. I was well taken care of from the start. Mr. Napolin took the time to put my mind at ease. All of my issues were resolved, and I received a very significant settlement in the end. I didn't expect the outcome, so it was a pleasant surprise. I highly recommend Napolin if you are injured in an accident."

The firm does not handle car accident cases alone. Other practice areas of the Personal Injury Lawyer Glendora firm are accident injuries, employment law, bankruptcy law, product liability, personal injury, torts & injuries, medical malpractice and workers' compensation law. Whenever an injury is caused by a negligent party, the victim has a legal right to seek damages under California state law. The victim is entitled to compensation in order to handle medical bills, lost wages and other damages (and possibly more under the personal injury laws of California). In situations where the harm was caused by a medical professional, whether by intention or by accident, a medical malpractice case may be filed. The firm also offers medical malpractice legal consultation to determine if someone has a case.

Napolin believes that a firm's success in previous cases and its length of existence will not determine the success of a particular client's case. This is because there are many other factors that will determine whether the case will see a positive outcome or not. These include the accurate evaluation of the case and its timely prosecution, in order to ensure that the client's overall well-being is improved. The firm, therefore, focuses on the present client and not on how much they have collected for former clients.

Typically, there are two kinds of damages that can be awarded as a result of personal injury claims. Compensatory damages can be awarded to help compensate the victim for injuries. Punitive damages are separate from compensatory damages and are reserved for those situations where the defendant has done

some malicious and severe actions against the victim.
